VIDEO 8

AMSTRAD VMC-8: £500

Features: 8x zoom; 1.2kg weight; backlighter for subjects in shadow; all the features in the box except cinema mode. **Comment:** "A surprisingly long lens for a cheap model. Zooming very slow. The viewfinder gives a good wide aspect, but the case feels flimsy, as if it wouldn't take much to damage it. I wouldn't give it to kids." **Picture quality:** reasonable, but colours poor. **Our rating:** two out of five.
