### IMPORTANT PLEASE READ BELOW...

The e-m@iler is subsidised by the use of the email service (as is similarly the case with most mobile phones). The sending and/or collecting of email has a minimum cost of 15p\* per session plus your local call rate per minute. A session can both send and collect waiting email at the same time (note that several email messages may be sent and/or collected in a single session, all for the same per-session cost). One of the conditions of sale relating to this subsidy is that the e-m@iler is used within the UK only – the unit will cease to operate unless it remains connected to a UK telephone exchange.

So that you don't miss any email, the e-m@iler is set to call and check for email once a day. This can be increased if required. Calls to check for email cost 15p\* per session plus your local rate per minute (average cost 17p\*).

**SO THAT YOU DON'T MISS ANY EMAIL, THE DAILY EMAIL CALL WILL RESULT IN A CHARGE OF APPROX 17p\* PER DAY ON YOUR PHONE BILL. ON QUARTERLY BILLS THIS CHARGE MAY BE SHOWN AS APPROX 90 SEPARATE DAILY CALLS.**

Note, a further condition of the subsidy is that from time to time you will see adverts displayed on your e-m@iler screen (sent at no cost to you). You may respond to these adverts or delete them as you see fit.

The e-m@iler incorporates Amsurf which allows connection to the internet enabling you to view low graphic content sites as well as a limited range of internet web sites. The cost of surfing is 5p\* per minute at all times.

The e-m@iler also incorporates additional features such as video phonecalls, MMS and SMS texting, downloadable ringtones and games as well as other services such as electronic greetings cards, mobile services, prank calls, etc. The cost of all these services can be viewed on the screen prior to purchase. \*Correct at time of printing. OTHER TERMS APPLY.

## IMPORTANT

The e-m@iler is subsidised by the use of the email service (as is similarly the case with mobile phones). The sending and/or collecting of email has a minimum cost of 12\* pence per session plus a local call rate per minute. A session can both send and collect waiting email at the same time (note that several email messages may be sent and/or collected in a single session, all for the same per session cost).

The e-m@iler is factory-set to make a call for email every 24 hours. This can be changed to suit your requirements. However, as a minimum the e-m@iler will make one call per week to check if there is new software which needs to be downloaded to upgrade the unit. Calls to check for email or software updates cost 12\* pence plus a local rate per minute regardless of whether any messages are present for collection.

One SMS message can be sent within one session. Electronic greetings cards can be sent individually at a cost of 25p per card.

Note, a condition of the subsidy is that from time to time you will see adverts displayed on your e-m@iler screen (sent at no cost to you). You may respond to these adverts or delete them immediately as you see fit.

The e-m@iler incorporates amsurf which allows connection to the internet enabling you to view low graphic content sites and a limited range of internet web sites. Surfing has a minimum cost of 12\* pence per session plus a local call rate per minute.

The e-m@iler also incorporates Spectrum Games Centre. The cost of games can be viewed on the screen prior to downloading and is dependent upon expiry time.

### Digital Cordless Telephone with Caller Display

THIS EQUIPMENT IS NOT TO BE USED FOR MAKING EMERGENCY CALLS WHEN THE POWER FAILURE ARRANGEMENTS SHOW NO ACCESS TO DIAL EMERGENCY SERVICES.

Before operating this equipment, please read these instructions.

The Pocket Dock-it is a hand-held phone which can be purchased for use as a docking station at the side of a desk. Email addresses stored in the memory are transferred to the Pocket Dock-it. Additionally, when you're on the phone, you can enter new names, numbers and email addresses.

The Pocket Dock-it also protects your entries on the e-mailer - in such a way that they are not lost.

Getting Britain emailing

THE E-M@ILER<sup>PLUS</sup> IS DESIGNED FOR INSTALLATION IN THE UK ONLY

# e-M@ILER plus amsurf internet access & games...

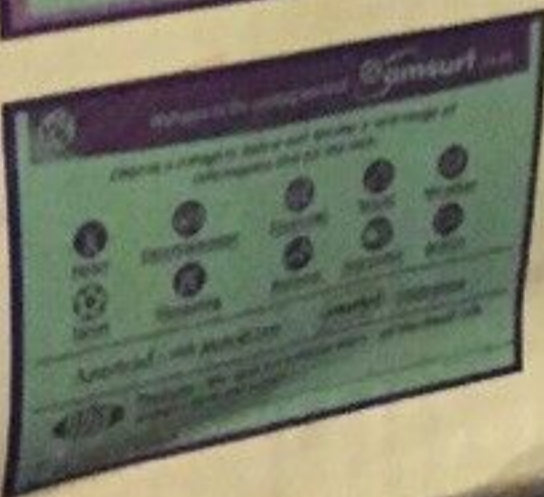

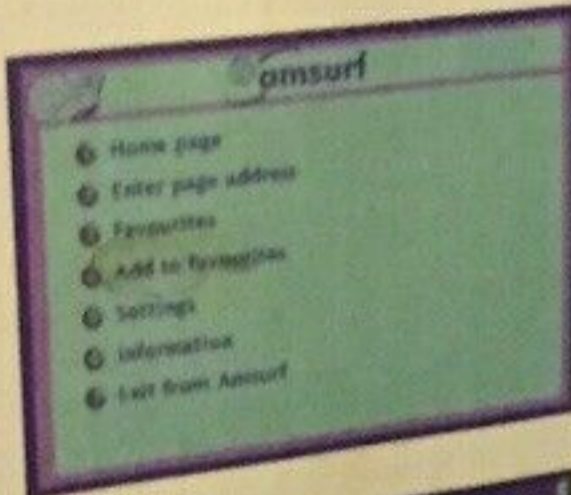

Amsurf opens up the world of the internet to the e-mailer<sup>™</sup> allowing access to browse a world of live online pages. From the latest news and weather, to sport and "hot" soap gossip, the mine of information is endless. And the beauty is that there's no difficult logging on - just push the

"amsurf" button to be connected instantly to the amsurf home page from where you can access the internet for instant browsing\*. So now you really can "amsurf" the internet and browse to your heart's content!

amsurf

*\*The e-mailer<sup>™</sup> uses Amsurf Internet which is specifically designed to display low graphic content sites. General web sites may also be viewed, but due to their complexity may offer limited access.*

## SECURE CREDIT CARD TRANSACTION READY

- A smart chip card offers higher levels of security or authentication of the user than current magnetic cards or indeed, a user speaking his PIN number over the telephone. These cards are easily identifiable by way of a small gold chip on the front of the card.

- The SMARTCARD slot on the side of the e-mailer<sup>™</sup> is an interface that facilitates communication with a smart chip card.

- The e-mailer<sup>™</sup> has all the necessary hardware required to enable this additional level of security **ALREADY BUILT IN**; it is only a matter of delivering the software code to the machine as and when it is developed. The software will be downloaded automatically to all e-mailer<sup>™</sup> owners in the future at NO cost to the user.

You can therefore feel safe in the knowledge that the e-mailer<sup>™</sup> is future-proof and Secure Credit Card Transaction Ready!
