△ AUTO STOP

The image shows the internal components of a portable audio device, likely a cassette player, with the top cover removed. The device has a black plastic casing with a textured interior. A white label with red text is placed on the right side of the casing, pointing to a small switch. The switch is located near a screw and a sliding control. The internal components, including the tape mechanism and various electronic parts, are visible on the left side of the device. The text "BASS BOOST" is embossed on the casing near the switch.

Bass Boost
