PC4386SX

**SMALL IS NOT JUST BEAUTIFUL** Don't be fooled into thinking Amstrad has had to make compromises. Take a look at the other PCs in your organisation, and compare them feature-for-feature with those of the PC4386SX. We are sure you will agree that the PC4386SX is an amazing feat of technology. Amstrad has integrated all the major components onto a single system board, using the latest 6-layer surface-mount techniques to achieve a greatly reduced footprint and increased reliability. And even with all that power in such a small footprint, there is still the space to expand.

Designed for maximum compatibility and connectivity, the PC4386SX is bestowed with a full range of industry standard interfaces, including RS232 serial port and Centronics parallel printer socket. The PC4386SX has two half-length 16-bit expansion slots for network, terminal emulation or modem cards, or indeed one of the thousands of industry-standard expansion cards available today.

**THE POWER TO COMMUNICATE**

**SUPER HIGH-DEFINITION DISPLAY** Amstrad has chosen Sony's acclaimed Trinitron® technology for the PC4386SX's high definition 10-inch VGA display. With its superb high-contrast picture tube and super-fine dot pitch (just 0.26mm), today's software could never look better.

The PC4386SX is also available with a high-quality 10-inch monochrome flat-screen monitor.

**QUALITY COMES FIRST** Designed and built to the highest international (RFI) standards, the PC4386SX has a sturdy metal base and cabinet to withstand the rigours of today's office. Amstrad's sleek new keyboard uses an ultra-compact "reduced-outline" casing to perfectly complement the small footprint of the PC4386SX. Its high-quality full-sized full-travel keys ensure that no sacrifices have been made to functionality or ergonomics. A hinged door on the front of the computer provides a convenient yet elegant connection for mouse and keyboard. And to make the most of its graphical user interface, the PC4386SX is supplied with its own two-button mouse.

The PC4386SX comes complete with the kind of features only supplied as expensive options on most other computers. And despite its sheer power, the PC4386SX is about the most user-friendly machine you can buy. When you need performance, elegance and no compromise - Amstrad delivers the complete solution.

**THE COMPLETE SYSTEM**

## SPECIFICATIONS

MODEL	PC4386SX
Processor Speed	80386sx, 20 MHz
Main Memory	4 Mbyte (parity checked) Expandable to 16 Mbytes on-board
Ram may be configured for	BASE (256k , 512k or 640 kbytes ), EXTENDED, and LIM-EMS
Cache RAM	64 kbytes
Co-processor	Socket for 80387sx-20 (User upgrade)
Real Time Clock	RTC has integral battery with 10 year life
Floppy disk	3.5" 1.44Mbyte
Hard disk	80Mbyte, 19ms, with look-ahead CACHE
Expansion slots	2 x 16 bit ISA half length
Graphics Interface	On-board VGA (EGA, CGA, MDA and Hercules compatible)
Keyboard	102 key 'AT' style enhanced keyboard. Slim design, standard key size and layout
Mouse	Amstrad mouse supplied
Software	MS-DOS v3.3 Windows 3 Amstrad Manager executive front end
Interfaces	Bi-directional parallel port Serial RS232c serial port Amstrad Keyboard + Amstrad mouse port VGA monitor port Monitor power port

## DIMENSIONS

Width	250mm
Depth	264mm
Height	70mm

## MONITOR

Screen	10" high resolution flatscreen, VGA mono 10" ultra high resolution VGA colour 0.26 dot pitch
