## Amstrad PPC 640D

---

Amstrad introduced the PPC-640 in 1988 as a low-cost **IBM**-compatible portable. It weighed 22lbs. It ran on ten C batteries or mains power and offered a 320x200 flip-up monochrome screen.

The CPU was an Intel 8088, clocked at 4.77 MHz. It came with a "full" 640K of memory and included a 2400 bps modem.

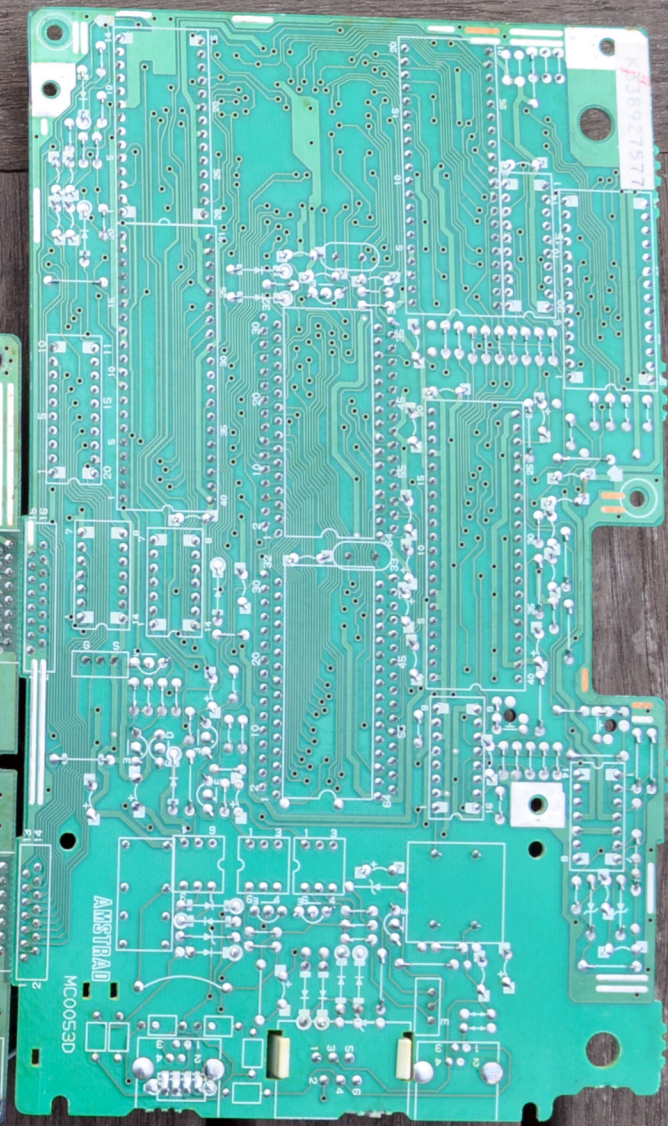

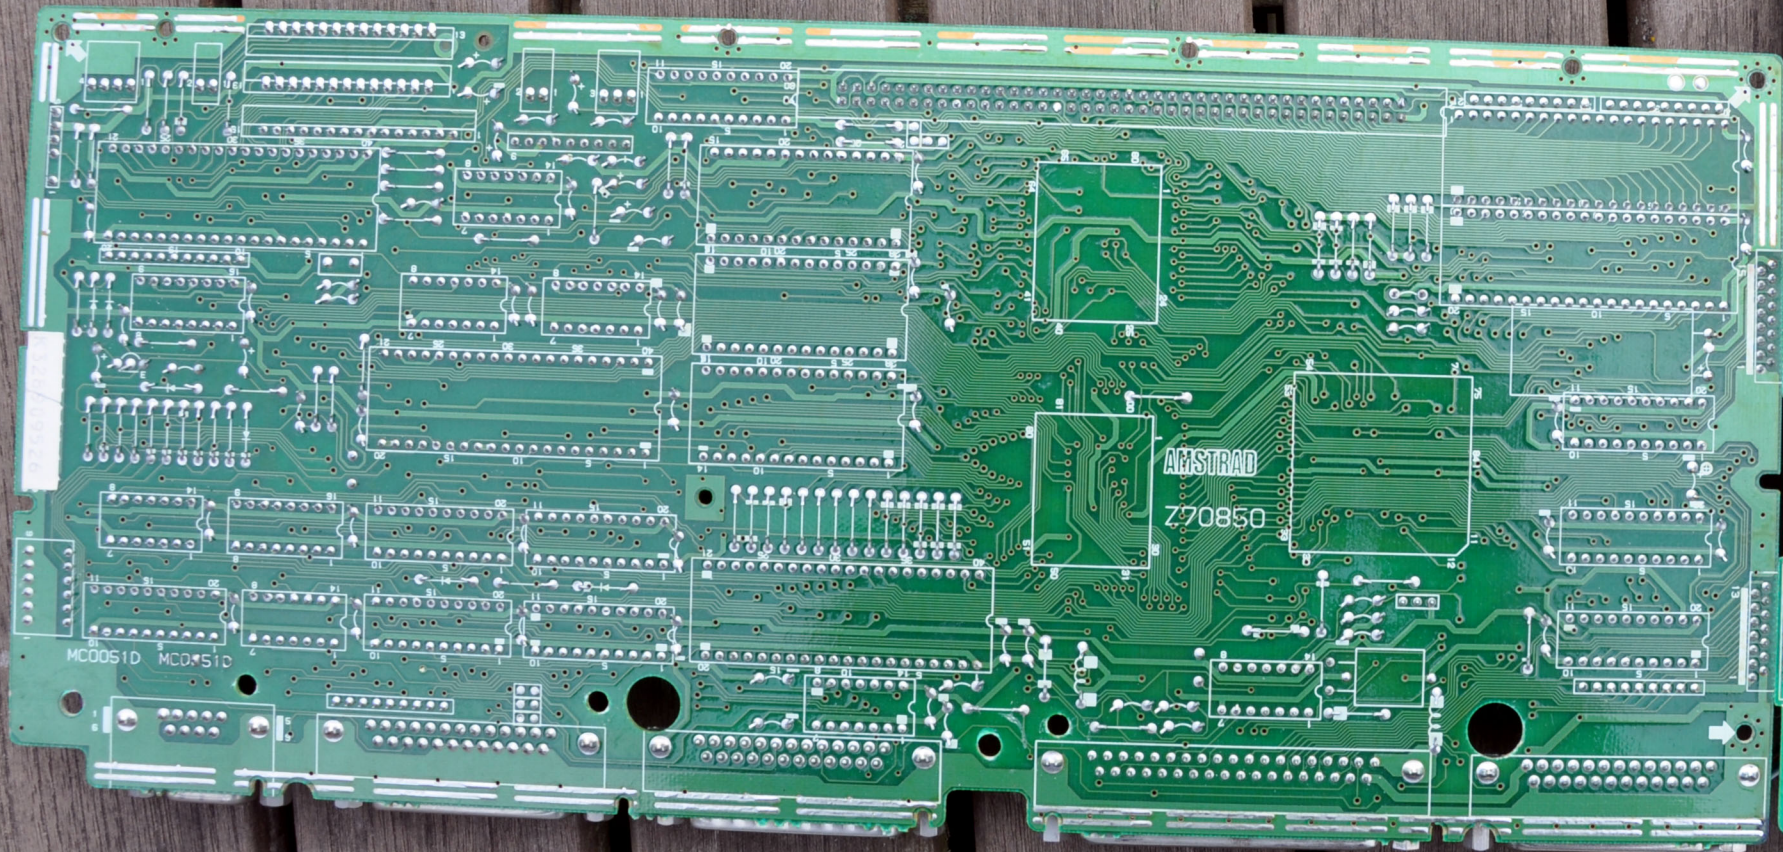

- 8088 CPU @ 4.77 MHz
- 2 - 720K FDD
- 640K RAM
- LCD Screen with MGA/CGA video connector. Optional external monitor available gets DC power supply from computer. Or you can use a regular Mono or CGA monitor and control video mode with built in DIP switch.
- 101 key keyboard
- 2 Serial Ports
- 1 Parallel Port
- Real time clock
- Uses 10 "C" batteries or 12 volt AC adapter
- Internal 2400 baud Modem w/standard telephone connection.
- Software supplied with computer: MS-DOS 3.3 w/special Amstrad functions CrossTalk Mirror 11
- Weight with carrying case, manuals, power supply and OEM disks is 22 lbs.

Complete with manuals, software and carrying case

Manufacturer: Amstrad

Date: 1988

A light grey messenger bag is shown from a top-down perspective, lying flat on a light-colored wooden surface. The bag features a large front flap, a smaller flap at the top, and two side pockets. A black rectangular patch with the word "AMSTRAD" in white, bold, sans-serif capital letters is centered on the front panel. A dark grey shoulder strap is visible on the right side. The bag's material appears to be a durable, slightly wrinkled fabric.
