AMSTRAD

THE ESSENTIAL CATALOGUE

AUTUMN WINTER 1989

A MESSAGE FROM THE USER CLUB

Dear Customer,

Welcome to the Autumn / Winter 1989 edition of the Amstrad User Club Mail Order Catalogue.
Throughout the catalogue you will find two different pricing structures. Our Non-Members price is the normal Recommended Retail Price of the product, and our Members price is the special discounted rate for Members of the Amstrad User Club only!
This is just one of the many benefits of Club membership, but if your not yet a member, don't worry, full subscription details can be found at the back of the catalogue.
Members and Non-Members alike can order with confidence in the knowledge that quality control from Amstrad Plc, together with our own comprehensive vetting system here at the User Club ensures that all stock items are top-grade products.
If you need any product not illustrated in the catalogue, help is at hand - simply contact our Product Locating Department on 091 510 8787 and we'll do our best to locate and depatch it to you - usually at the best price in the UK.
Our range of catalogues include separate CPC, PCW and PC/PPC editions, so if you'd like to order additional copies, just ring or write and we'll despatch them immediately.
We hope you gain as much pleasure reading this catalogue as we've had in compiling it and hope to continue providing an excellent Service for you - The Amstrad Computer User.
Kind Regards,

Keith Patterson

The PCW 8256

With 256K RAM, built-in disc drive, monitor, LocoScript Word Processing software and complete CP/M Plus computer power, Amstrad will speed up the way in which the microcomputer takes away the drudgery of office routine, simply, efficiently, completely.

The PCW8256 keyboard contains 82 keys designed to work directly with the Locoscript software helping to make the job easy. The 'pull down' menus of operations are accessed using special function keys.

Each disc holds some 180,000 characters. And since an average A4 page contains between 1000 and 1500 characters, that's quite a tidy alternative to 50 or so file folders.

If your business involves standard letters and forms of contact, then you can recall a "template" document and just change the names and customer specific details or anything from a single quotation to a complete contract.

The word processing software supplied has been specifically written to provide the features and facilities expected on a professional stand alone word processing system, and will permit simultaneous printing and editing features such as pagination, automatic paragraph alignment and realignment are provided together with a powerful collection of editing features such as cut and paste. Amstrad also offers you a completely functional advanced computer that features the world famous computer operating system CP/M Plus.

The PCW9512

The PCW9512 is the latest in the incredibly successful Amtrad PCW family of wordprocessors.

This complete word processing system features a newly styled keyboard designed to take full advantage of the extra speed and facilities available on the latest version of LocoScript, and the PCW9512's daisy wheel printer gives you perfect letter quality print.

The PCW9512 disc holds some 737,000 characters, an average page of text contains between 1000 and 2000 characters, so you can save up to 700 pages on one disc.

LocoSpell is a fully integrated part of the word processing software and contains a massive 78,000 word dictionary. Use it to check the spelling of a single word during the writing or editing of a document, or for checking a portion, or all of the document.Another fully integrated facility supplied with the PCW9512 is LocoMail, a very powerful mailmerge program which enables the user to combine mailing lists with letters, producing personalised letters from a single standard document.

The optional CPS8256 offers an RS232 serial interface with an additional Cnetronics parallel port. This allows connections to other computers, or with a modem to link to electronic communication and mail services such as Prestel and BT Gold. External printers may be connected to the built-in parallel interface or to either port on the CPS8256. Including the daisy wheel printer supplied, it is possible to have 4 different printers simultaneously connected each individually addressable.
The PCW8512

The PCW8512 will perform all the word processing functions found on the PCW8256 but in addition will allow you to store and process much greater amounts of information. Should you wish to install alternative word processing software such as LocoScript II or NewWord, the extra storage capacity will prove invaluable when handling very large documents, extensive name and address files and dictionary files.

The second disc drive on the PCW8512, although physically the same size as the first disc drive can store four times as much information a total of 1 MegaByte (720K Bytes formatted). Over 200 separate files can be stored on this disc, all accessible within seconds!

The copying is all made easier with the increased capacity RAM disc. The 1 MegaByte disc drive will allow you to create huge datafiles for database and accounts applications, or simply store a large number of individual documents or programs.

The PPC Range

The PPC640 and 512 give you the freedom you need in today's fast-changing business world.

Amstrad portable compters are true MS-DOS compatible computers supplied with MS-DOS 3.3 and with 512K of RAM on PPC512 and 640K of RAM on PPC640 as standard. Which means you can use all popular MS-DOS software. Bestsellers like Lotus 123, Symphony, Wordstar, Supercalc and dBase run perfectly on the new PPC range. Even graphics are supported. Graphs, bar charts and pie charts can be shown on the LCD display.

Amstrad portables come with single or twin 720K 3.5" industry standard disc drives.

The PPC's standard parallel and serial expansion sockets give you easy expansion link-ups with a wide variety of peripherals such as printers and plotters. And since the modem is built in (PPC640), we've also included a line connector and phone jack.

Amstrad PPC's come complete with 'PPC Organiser' Software, an integrated package, including a Word Processor, Address Book, Electronic Notebook, Diary Calculator, Auto Dialler - plus Manual and Software Discs. A powerful addition to your portable computer supplied as standard.
The PC1640

The Amstrad PC1640 puts computing power on the business professional desktop. It provides them with all the facilities they need to do business planning and forecasting, correspondence, analysis, accounting and reporting, and it offers them the capability to run exciting new business solutions such as Desktop Publishing or Computer-Aided Design. The PC1640 has exceptional graphics capability to ensure effective presentation and communication, a large memory to deal with the most complex task, access to public and corporate databases, and the capacity for expansion. It can be used as a powerful multi-tasking workstation or integrated into a corporate information system.

The PC1640 allows you to run a range of application programs that can be used to improve the overall efficiency of your business. You can run any of the leading IBM-compatible programs available or choose the high performance, value-for-money range of Amtrad Professional Software including Wordstar Express, Supercalc 3.21, Amstrad InfoMaster, AccountsMaster, PayMaster and games programs.

The Amstrad PC1640 has both serial and parallel printer ports so that it can be connected to almost any printer but to get the most cost-effective printed results, choose from the range of high-quality dedicated Amstrad printers.

The new Amstrad MC2400 PC Modem Card is ideal for high-speed data communications. The quad standard unit has four operating speeds, including V22 bits capable of transmitting and receiving data at 2400 bits per second.

The MC2400 Modem Card simplifies data transfer and gives the PC1640 a gateway to a vast network of global communications. It facilitates access to telex, electronic mail services and commercial databases all with the simplicity of a telephone call.The PC1640 is an ideal networking product it can be linked to mainframe, providing upto three extra network terminals for the price you could pay for one, and it can improve productivity dramatically.

The PC1512

The ideal computer for all businesses for taking work home, for game playing or for learning on the industry standard.

The PC1512 comes with monitor, keyboard and the revolutionary GEM software to make using your PC1512 so simple that anyone in your family can use it - even the adults!

The PC1512 has a massive 512K RAM main memory, part of which can be configured to act as a high speed RAM disc drive for running programs.

It uses an 8086 processor operating at 8MHz so your software will run at speeds that are considerably faster than any other PC's.

Using your PC1512 couldn't be easier. Thanks to GEM (Graphics Environmental Manager, Desktop Paint, and Locomotive BASIC 2) there is no longer any need to learn complex commands and master obscure features.

The PC1512 360K built-in floppy disc loads and saves programs and data in seconds. So unlike the majority of home computers which use slow cassettes, you won't be kept twiddling your thumbs.

3

The Amstrad PC2086

The PC2086 is designed to be the ideal introduction to the series bridging the gap between existing machines and the more advanced PC2000 machines. It is also ideal for use as a stand alone system or as part of a large multi-user network of machines.

Using the Microsoft MS-DOS 3.3 operating system, the PC2086 also features Microsoft Windows V2.03, while the use of 1:1 hard disc interleaving and a full 16-bit internal bus means that the full processing power of the 8MHz 8086 microprocessor is used to maximum advantage. 640K of parity checked high-speed RAM is standard with a choice of either single or twin 720K 3.5" disc drives, or a 30Mb hard disc version with single 720K 3.5" disc drive.

A highly integrated design means that many features that would normally occupy valuable bus slots are incorporated on the motherboard including the floppy disc controller, serial and parallel ports and controller for the integral mouse.

The PC2086 can be used with any of Amstrad's new range of antiglare VGA compatible monitors and has the added advantage of an inbuilt drive adaptor so that 5.25" software and data files can be accessed and used normally through a standard external 5.25" disc drive.

The Amstrad PC2386

The PC2386 is the flagship of the PC2000 series, for the high end workstation user. Throughout the design of the system, advanced techniques have been incorporated to take full advantage of the 20MHz Intel 80386 processor including 64K of RAM cache memory, asynchronous expansion bus operation and effective zero wait state memory operations.

It is supplied with MS-DOS 4.0 and can be used with OS/2 and also includes Microsoft Windows 386 to allow users to access several Windows or DOS applications at one time.

4Mb of parity checked high speed memory with a full width 32-bit bus and a 65Mb hard disc with sector buffer are standard. Users can switch the addressing of main memory areas through software, allowing fully flexible allocation between base, expanded and extended memory.

The RAM is expandable to 16Mb on the motherboard, while virtual memory operation allows applications to use hard disc storage as RAM. Again the external drive adaptor allows the use of 5.25" disc format and also tape streamers for back up data storage.

◀ The Amstrad PC2286

The PC2286 is based on the powerful Intel 80286 microprocessor operating at 12MHz. It is supplied with MS-DOS 4.0 when expanded can be used with OS12, and also includes Microsoft Windows 286 which allows users to access several Windows applications at one time.

The use of 1:1 disc interleaving and asybchronous expansion bus operation means that the full processing power of the 80286 is used to maximum advantage, while the Amstrad VGA monitors with a dot-pitch as low as 0.28 provide a crisp high resolution display in either full colour or monochrome.

1Mb of parity checked high speed RAM with a sophisticated 12MHz 16/32-bit internal bus is standard. RAM is expandable to 4Mb.

Twin 1.4Mb 3.5" disc drives or a 40Mb hard disc with a single floppy drive is available. The hard disc version features 1:1 interleaving for maximum reliability.

Animal/Vegetable/Mineral (Age 7-Adult)

The child is requested to think of an object that is either animal, vegetable or mineral. The program will now try to guess what the child has thought of. It asks questions about the object and then guesses what the object is.
  If the program does not know that object then the child can 'teach the computer' about the object. The child also needs to give the program information to tell the object apart from the other things it knows. At the start the program knows only a little, so it is easy to teach the computer things. The more it knows the more the need to look things up! The information stored can be saved and reloaded at any point in order to continue to build up what the computer knows at a later date.

Happy Letters (Age 3-6)

A column of letters appears on the screen. A moving letter gradually moves down the column. The child needs to press a key when the moving letter is the same as the one opposite. When correctly matched, a fish swims out from the side and eats both letters before swimming back with a smile. If wrong letter matched then the child is given another go. Only if the second attempt is also wrong does the program show which letter gives the correct match.
Later stages teach the child to match the capital and lower case letters, and to match a key with a letter on the screen. The speed of the program can be set according to the skill of the child.
Happy letters records all the answers a child gives and consequently, children's progress can be checked very easily.

Happy Writing (Age 3-6)

The program draws out bright coloured letters, numbers or words, with the moving 'magic pencil' point showing clearly where to start the figure, which direction to take, and where to end. The speed with which the figure is drawn out can be adjusted to suit the user. The set of three figures or the word is initially drawn out on the top of the screen, between the lines pulled across by the tractors. The pencil then appears and the program waits for the child to press the space bar and begin to follow on paper each figure as it is drawn out on the screen. A pause is allowed between each figure and a tune played as a reward for each figure completed.

Happy Numbers (Age 3-5)

The program first draws a large clear figure between 1 and 9. The child has to find the matching key on the keyboard. Each time the child presses it, a flower appears. The child needs to collect the right number of flowers to match the figure. Success is rewarded by a smile and entertaining sound and visual effects.
If the child makes a mistake then the 'Happy Face' grimaces, the program shows what was wrong, and then allows the child to learn the correct answer.
If the child finds some numbers difficult then the program can be set to give the child more practice on those numbers. The program notes the child's answers so that progress and problems can be readily seen.

Micro English

Complete course taking users from 8 years old to GCSE Level. It consists of 24 easy-to-use programs which includes around 600 questions. Some programs include real speech, so the computer appears to teach the student by speech and the written word, as a private tutor would. The program can be easily adapted to include the student's own spelling tests and questions.
The course emphasises not merely the rules of English, but more importantly their application. In practice, with a limited number of questions set for either normal or multiple-choice questions. It is also for those learning English as a foreign language. The subjects covered include punctuation elementary and advanced spelling, vocabulary tests, figures of speech and arrangement, words commonly confused, irregular plurals, word reduction for summaries, 8 passages to be summarised, and 8 comprehensive tests.

Map Rally (Age 7-13)

Somewhere on a grid are three hidden checkpoints. The navigator can only give the rough direction in which they lie. The car is moved across the grid by giving instructions as to where it needs to go to. When the checkpoint is found, the player must check in. A player can race against the clock or two cars can race against each other. Children soon become used to using co-ordinates and compass directions to control the cars. The program records the time and number of moves taken. After the rally, the children can watch the cars drive around each route taken showing how well each car did.

Magic Maths (Age 4-8)

"Here at last is a program that really does merit the term educational game, a program which uses the graphics and sound of the Amstrad to try and liven up the learning process. I suspect that the targeted age group would enjoy as well as learn from Magic Maths". (Peter Connor Editor Amstrad Action. April 86).
"A serious challenger to similar BBC programs" and a "good example of its type" said Primary Teaching and Micros (UK).
The game idea is simple but effective the operands in the questions - addition or subtraction are displayed on railway carriages at the bottom of the screen on Amstrad CPC. If you get it right, the train's speed increases by 10 m.p.h. The aim of the game is to get up to 100 m.p.h.

Maths Mania (Age 8-12)

It does the job it sets out to do. My son (nearly nine) has been sneaking downstairs before breakfast to play. Evidently it appeals to the age group at which it is aimed. Review on BBC TV Ceefax. This program is similar to Magic Maths design but its educational content is different and for a different age group.
Like Magic Maths, it also has a scrolling score sheet which will retain full details of performance and indicate areas of weakness. The program offers the child a challenge, encourages with lively responses, stimulates interest through the use of a lively game and has excellent graphics and sonic effects.
The emphasis is on multiplication and division with many levels of difficulty to suit different ages and abilities. There are different versions of the program on the various machines.

Maxi Maths (Age 9-14)

Teaches basic geometry with graphic demonstrations. There are tutorials which give lessons on angles, triangles, circles and rectangles. The learning is reinforced with good graphic demonstrations which make excellent use of the computer as a teaching aid.
The program can be used to draw circles, triangles and so on. You also get assignments to test your knowledge of a selected subject area. There are courses on each of the following.
*Triangles   *Rectangles
*Angles   *Circles
*Sin Cos Tan
A highly interactive program such as BASIC GEOMETRY provides a very stimulating learning environment. This course would be most useful for a student in the early stages of a GCSE course who wished to revise material.
The program represents excellent value for money in that one is covering all five topics for the price of one

Osprey!

In the world of computer games it's common to find birds of prey threatening the survival of their human opponents usually on some inhospitable planet light years from our own.
In reality, as 'Osprey!' vividly reflects, the situation is just the opposite. Man is the more men menacing predator and for a hostile environment you need look no further than the highlands of Scotland.
Developed in conjunction with the RSPB (and based on their site at Loch Garten in Scotland), 'Osprey!' is a highly original game intended to illustrate the complexity of wildlife conservation.
Given the responsibility of protecting the precariously small Scottish Osprey populations, you have at your disposal a team of wardens. They will enable you to keep egg-stealers at bay, prevent huntsmen from shooting the birds, and control the ever-inquisitive tourists who can easily disturb the nests.
After allocating the wardens to their duties you can see how successful your strategy has been. And as in real-life, certain factors (like the weather) remain beyond your control. So the problems of ensuring the Osprey's survival are by no means straightforward-as the RSPB will tell you.

Physics Revision

The disc contains nine programs to aid your physics revision. the first two programs test your existing knowledge so that you can see where your strengths and weaknesses lie. The next six programs concentrate on topics which often cause difficulty. The final program allows you to keep notes during your revision. The notes can be saved for future reference. The programs have been designed and tested by physics teachers working in schools with pupils taking both 'O'Level and CSE examinations. The new GCSE syllabus has been taken into account in the design of these programs. The main topics covered include:
*Ray diagrams for mirrors and lenses
*Heat transfer mechanisms
*Heat capacity and latent heat
*Linear expansion of metals
*Gas laws
*Circuit analysis
*Electrostatics and electromagnetism
*Equations of motion with constant acceleration
*Waves
*Radioactivity and radiation

The Spanish Tutor

These simple-to-use programs are designed as an aid to modern language learning for beginners to GCSE level entrants. Being totally bi-lingual, they may also be used as an English learning aid by native French, German, Spanish or Italian speakers. Each program features:
*Self-teach modes, including single-step or automatic display and colour coding to reinforce gender learning
*Self-test mode, including translation tests from English into the foreign language or vice versa and a help-prompt facility.
*Lesson creation/editing facilities, including an indefinite number of new lessons which may be created using the simple commands provided.

Timeman One (Age 4-9)

The program draws a clock and places a man halfway up a ladder. The program asks "what time is it?" If the child answers correctly then the man climbs two steps up the ladder. When an answer is wrong, then the man goes down a step. The program tells the child what was wrong and gives the child another go. If the second try is wrong, then the program shows the correct answer. When the child obtains enough correct answers for the man to reach the top, he dances a jig at the top and plants a flag. Each time he gets to the top he earns another flag. The program has three stages for telling the time. The first stage introduces the hour hand, the second the minute hand and the third stage combines the two. Having learnt to tell the time, the program provides three similar stages to enable children to set the clock, in each case helping children when an incorrect answer is entered.

Timeman Two (Age 4-10)

The program draws a clock and places a man halfway up a ladder. The program asks "what time is it?". If the child answers correctly, then the man climbs two steps up the ladder. When an answer is wrong, then the man goes down a step. The program shows the correct answer.
When the child obtains sufficient correct answers for the man to reach the top, he dances a jig at the top and plants a flag. Each time he gets to the top he earns another flag.
The program has three stages telling the time. The first stage deals with minutes to the hour, the second with quarter and half hours, the third introduces the 24-hour clock. Having learnt to tell the time, the program provides three similar stages to enable children to set the clock, in each case helping children

when an incorrect answer is entered.

The program follows on from Timeman One, but can be used equally well on a totally independent basis.

Tutor Programs: Study Aids for GCSE and Degree Students

The Primary Function of the Tutor programs are to test the student's grasp of knowledge already acquired from other sources, either from the set texts in the case of English Literature, from recommended reading, from school text books, or from teacher's notes, and reinforce the student's confidence that some of the essential facts have been mastered. The programs are NOT intended to be a substitute for reading and discussion, nor are they to be thought of as self contained teaching units though each package includes a Booklet of advice and further reading which could be used as a basis for distance learning.

Wordhang (Age 5-Adult)

The program selects a mystery word which appears as a series of dashes. The object is to discover what the word is by choosing appropriate letters. If the letter chosen is part of the word, then it is shown in its correct position. Gradually the world appears as more and more correct letters are chosen. When a letter does not appear in the word - part of a man is drawn. He has only ten parts, after ten wrong letters he will hang! He can only be kept alive by using your language ability.
The program already knows over 250 words. You can add as many more words as you like. A player can race against the clock or play against someone else.

World Wise (Age 7-15)

This program is attractively different from most in that a child can teach the computer instead of the other way around. Both the child and the computer learn a great deal whilst using this program!
The child can put in already familiar items or can research something new. As a result, the program can be used at a level to suit the skills of the user.
The child first thinks of a particular geographic feature. The computer then tries to guess what the child is thinking of by asking questions. If the computer gets it wrong then the child can 'teach it' by typing in the object and a particular distinguishing feature. It motivates the child to find information in order to tell this object apart from other things the computer knows. The program can be used for features such as rivers, towns, lakes, etc... or in the wider context of world geography, such as mountain ranges, oceans and seas, continents, etc.

Easiart

Easiart is an extremely powerful drawing package for the Amstrad 6128, 664, and 464 microcomputers.
The software is fast (written in 100% machine code), very user-friendly and its versatility allows it to be used with a TRACKER BALL, MOUSE or JOYSTICK, making outstanding value for money.
Use Easiart in the office or workshop for Technical applications e.g. plans, circuit diagrams, etc. Then try Easiart at home for masterpieces garden plans, designing Fair Isle patterns etc.
Among the many powerful features of the program is the ability to swap between the ART, ICON GENERATOR and PATTERN GENERATOR sections whilst drawing a picture. This means the icons and patterns can be designed for use in the current picture, whilst drawing or designing.
This software is currently being used by Government Departments, Educational Establishments and Multinationals.

Stock Market

Stock Market is a program designed to help you plan you investments and keep a close and careful watch on their progress. It enables you to record full details of your purchase and sales of stocks: shares: unit trusts: and other securities, dividends can be recorded as they are received. If required cash balance is saving shares, unit trusts, exchange indexes etc. Stockmarket does not have to be used with your real investments. We all see shares recommended in a newspaper or magazine that we think we will do. Six months later if the price has gone up we wish that we had trusted our judgement. If the price has fallen we quietly forget it. With Stockmarket you can record details of as many share folios as you want. These can include buying and selling shares: Penny shares or whatever you choose. You can practice buying selling shares and see how well you do. The program is easy to use and comes complete with a comprehensive manual and demonstration files including real price information going back several years for several shares:

Inc. FT30 Index and BT...you can plot graphs away...

Tascopy 464 The Screen Copier

A suite of fast machine code screen copy software for the Amstrad CPC 464, 664,6128. Tascopy 464 adds two special commands to the Amstrad BASIC.

The ICOPY command print a high quality resolution screen copy on your dot matrix printer. The printed screen copy is approximately A4 in size although there is some variation between makes of printer and different screen mode. Screen colours are printed with differing dot densities to give a shaded monochrome representation of the screen colouring.

The IPOSTER command produces a "poster size" screen copy printed onto two or four sheets of paper which can then by cut and joined to make the poster. These poster size copies are shaded in the same way as the ICOPY screen copies.

Tas-Diary

Tas-Diary - the electronic diary for the Amstrad CPC 6128, 664 and 464 with disc drive.

Tas-Diary is a fast and efficient electronic day-to-day diary. Tas-Diary features a separate screen display ("page") for every day of the year. Each page includes the current date and time, a calendar for the current month, and a large area for making your diary notes. Each diary opened includes several note pages and a memo pad.

With your Tas-Diary you can create a diary not just for this year but for every year into the distant future! You can even use Tas-Diary for past years if you want to keep "historical" data. All entries made with Tas-Diary are automatically saved to disc upon closing the diary.

Tas-Diary has an automatic sort facility. This means, for example, that the list of appointments could have been entered in any order - Tas-Diary will sort them into logical order. There is also a find facility which searches the current month in memory for each occurrence of a particular name or event. With these and other features Tas-Diary is an invaluable aid to keeping records, reminders, and any other data which is related to that most valuable commodity of ours - time!

Tas-Spell

Tas-Spell - An additional facility for the Amstrad word processor Tasword 464-D and Tasword 6128.

Spelling mistakes and typing errors spoil any document whether it's a private letter or your latest novel. If your spelling is anything less than perfect or you have to proof read long documents the Tas-Spell an essential requirement for your Tasword 464-D or Tasword 6128.

Tas-Spell checks the spelling of Tasword 464-D and Tasword 6128 text files. The program compares each word in the Tasword file with the words in the Tas-Spell dictionary. The comprehensive dictionary contains well over 20,000 words and grows as you use it. If a word is not recognised than the relevant part of your text is displayed with the suspect word highlighted. Options then enable the user to correct the word, ignore it (it might be a name), or even add it to the Tas-Spell dictionary. If you produce documents in connection with an unusual or technical subject Tas-Spell will soon learn all the words you use. The space available on the Tas-Spell disc will allow approximately 10,000 words to be added to the dictionary.

Tas-Spell can also be made to produce a print out of ever unrecognised word found, along with its line and column number in the text file. With Tas-Spell you are free to be creative in the confident knowledge that your spelling won't let you down.

Alex Higgins World Pool

At the start of play, seven spotted balls and one black ball are placed in the form of a triangle near one end of the table. A white ball known as the Cue ball, sits within a 'D' shape drawn on the baize at the other end of the table. The player must strike the white ball, such that it hits the back of the balls. If any of the striped or spotted balls are knocked into a pocket (pocketed), the player must subsequently during the game try to pocket balls of that type only. If no balls are pocketed the first ball to be pocketed determines a players group by default. If the first time a ball is pocketed, a ball of the other group is pocketed as well, the player may take his choice of group, and this choice will be indicated by the group of the next ball to be struck.

Avon

In this light-hearted but immensely challenging look at the Bard's world through the keyboard of modern man, you find yourself, after watching too many Shakespeare plays (or perhaps reading them) wandering around a strange land. Here they use a richer language than usual, and some of the scenes remind you of certain Shakespeare plays. How you are going to return successfully to the present day is something that you will have to work out for yourself.
*Why does the adventure take place on three different dates?
*What is the significance of the lady Portia's caskets?
*Why does Yorick sometimes say "Golesida" and sometimes something else?
*Why do you suddenly find yourself wearing an ass's head?
These are just some of the tantalizing puzzles that you'll meet when you welcome AVON....An exhaustive knowledge of Shakespearean Canon is not necessary as, in most cases, just the problems rather than the solutions are taken from Shakespeare. If you get stuck, or-line help is there to stop the sighing....

Wally is back, this time with his family in the first ever Multi Role Arcade Adventure. Not only does Wally appear fully animated but also Wilma, Tom, Dick and Harry. The purpose of the game is to find the combination for the safe and then pay the gang's wages. The combination is split and can be found in different locations. Not only must the combinations be identified, but also the right items to collect the combinations must be used. The locations are many and varied and contain zany arcade sequences which must be complete to finish the adventure. Each character has specific abilities and it is up to the player which one will perform a particular task. The game starts with the whole gang in the Town Square by the fountain. You have control of Wally so the rest of the gang go off about their own business. As Wally cannot do everything himself you will have to select one of the other characters (except for Herbert, he is totally uncontrollable) to perform the various tasks. While a character is not under control he or she may be carrying out other tasks which could help or hinder you.

Fernandez Must Die

RID YOUR FREEDOM-LOVING NATION FROM THE TYRANNY OF AN EVIL DESPOT....

The state of El Diablo is in turmoil, the democratic government has been cruelly deposed in a military coup and the evil General Fernandez rules.

Fight your way through the army of this mad despot, make your way by jeep and on foot across the country to destroy the military bases and of course your target, FERNANDEZ.

Your task is not an easy one and in order to assassinate Fernandez you will encounter armies, parachutists, planes, trains, jeeps, ammunition and secret gold dumps in your quest to reach your target and release El Diablo from his tyranny.

Fernandez Must Die is packed with action: a huge map to explore and hundreds of prisoners to free, gold to 'liberate', armories to raid and destroy. Pit your ingenuity and arcade skills against the size power and madness of Fernandez' military regime. If you succeed you will be hailed as El Diablos liberator, failure means a funeral service.

Fernandez Must Die features superb animation, great graphics and fabulous sampled sound (samples on some formats only). The gameplay is astonishingly addictive and, with the two player option available (on most formats), it'll knock the stuffing out of the competition.

Free 'Fernandez' badge and 'Fernandez' poster and T-shirt offer.

Gilbert - Escape from Drill

Yes, everybody's favourite snotty green alien has arrived on our computer screens in his very own computer game.
Since filming in Tyne Tees studios, Gilbert has hopped into his Millenium Dustbin and flown back to his home planet, Drill.
Gilbert hears the news that he's being offered another contract and is rabbitting on about it to his fellow Drilleans. In order to stop him from having more TV exposure to brag about, they have half inched vital components from his spaceship.
You are Gilbert and it is your task to reassemble your craft and get to the recording studios with 24 hours!
The Drilleans challenge Gilbert to play some video games - if he can win them he will get a clue as to the components whereabouts. If he loses, he gets a time penalty.
Gilbert then has to rush around the planet looking for the video game machines inside the Milk Bars and Snot Burger Restaurants!
After playing the games and having sussed the clues you now need to move across the planet to retrieve the missing parts before flying back to Tyne Tees TV studios.

ADVANCED DUNGEONS AND DRAGONS
Heroes of the Lance is the first computer game that re-creates the epic battle between good and evil on the world of Krynn. (It is based on the first DRAGONLANCE module, Dragons of Despair). Control eight companions in turn, in real-time action and full animation. Guide these brave adventurers each with different specialised skills, deep into the ruins of the temple Xak Isaroth to retrieve the precious Disks of Misbakal. As you descend into the Abyss, the companions must defeat hordes of monstrous Draconians in hand to hand combat, deal with powerful magic and survive the vicious attacks from Gully Dwarves, giant spiders, the undead and countless other terrors. But your final obstacle makes these monstrosities innocuous by comparison. The platinum discs you seek are guarded by Khusanth, an ancient black dragon and there is one way to vanquish this mighty beast. Find the key to destroy Khisanth and the companions will take their first steps to earn the noble title, Heroes and the Lance.

Jaws

DAA DUM. DAA DUM. DADUMDADUMDADUM!!! Just when you thought it was safe to venture back into the water, Screen 7 brings to you 'Jaws' based on the popular box office attraction of the same name. The monstrous great white shark is terrorising the beaches of Amity Island. A grim discovery confirms the worst - he's out there and he's hungry. Mayor Vaughn engages a professional shark hunter, but a storm wrecks his boat leaving Jaws to continue destruction of the sea world. His equipment with which to capture and kill the shark is scattered on the sea bed and amongst the caves and chasms. You are Police Chief Brody whom Mayor Vaughn turns to in desperation. With you are two colleagues, Hooper the shark expert and Quint the manic shark hunter.
You set off to retrieve the equipment. Whilst JAWS roams the clear water you must undertake hazardous deep sea dives into a world of hostile sea life and unforeseeable dangers.
Mayor Vaughn is impatient. The death toll is rising and the beaches are closing. Your job is at risk. Can you rid Amity Island of this visitor before it is too late?
This is the first time that Jaws has been introduced to the computer screen and is THE game to follow THE film. "Your Sinclair" July 1989 edition has given it a rave review.

Navy Moves

What's life on the ocean wave like these days?
You are assigned to take out the enemy's new U-5544 nuclear submarine, you'll have to complete a two stage ordeal before getting the chance. In stage one you are thrown into a dinghy type motorboat travelling along in a horizontal scroll. There is shoot-'em-ups' against enemy motorboats and mines and also an occasional shark.
There are three zones which have to be completed before moving on to stage two. Zone one has your commando driving a motorboat through mine infested waters. Timing has to be crucial as you have to jump over mines and shoot kamikaze commandos before they bear down on you with their aqua-bikes. In Zone two your commando slips into wetwear to find the entrance to the enemy base but watch out for the sharks! A sharp blow with a handbag on the nose can deter them and the enemy scuba divers which guard the entrance. Once past you have to capture a miniature submarine in order to cruise into zone three. You are inspected by a giant octopus and eventually come face to face with a huge, long thick sea monster which you have to kill. In stage two the objective is to make a deep penetration of the submarine and place a bomb at the base of its nuclear reactor, stop the submarine, make it emerge from the sea and then transmit a message from your base. The visuals are really good with an impressive red skyline in stage one's seascape and some well drawn sprites.

Neil Android

In the year 2199, the Spaceship 'Epic' was caught in a plasma storm and forced off course through a space warp into unknown space.
Due to damage sustained during the storm, the 'Epic' has been forced down to an apparently uninhabited planet. Whilst on planet, the ship, unknown by the crew, became infected with an Alien Life Form (ALF).
Several crew members were killed on contact with the ALF. The captain of the Epic gave the order to abandon ship and the crew teleported to a nearby planetoid to await rescue. The last crew member to leave, activated the ship's on-board cleaning system whose Servodroids would hunt and destroy any

ALF's on the ship. On hitting an ALF, they self destruct, leaving their energy rolls behind.

Popeye

Life's not all a bowl of spinach for Popeye as he hunts for hearts to win the love of Olive Oyl. His rival, the macho Bluto, is not amused. He thumps around making a pulp of Popeye.
Olive Oyl demands a never ending supply of love. Keep her sweet by collecting 25 scattered hearts and handing them over.
Take care to check Olive's loveometer. When her love level starts to fade you must restore it by delivering some of the hearts you have collected. The task is not easy. Hearts can be anywhere - up the lighthouse, on board the ship, under the ocean, locked in the house, on the roof, inside the fruit machine...
It's not just the right door keys that Popeye needs to collect on his way. The sailor man is not the only one seeking Olive Oyl's love. Bluto is his rival pacing up and down outside Olive's house. Avoiding Bluto and all other moving objects - giant birds, flying witches, snoring dragons and gnashing sharks - as they have a habit of knocking Popeye for six.
He'll survive if you have a tin of spinach in store for him, of course, but you can only carry eight things around with you - including the heart and keys as well as the life-giving green stuff.

Rally Driver

To complete successfully in a car rally requires more than just fast driving. You must plan your route carefully taking many things into consideration, the weather, longest and shortest routes, which are fast roads, which are slow roads. Drive quickly, but carefully. You must always be on the look out in case spectators or farm animals have strayed onto the road. The rally takes place in 3 stages over 3 gruelling days or nights. To win a cup you have to come in the top three after the third and final stage. The competition is tough. Only the top seven competitors can proceed from Stage 1 to 2, and just the top five go through to Stage 3 from Stage 2. Each stage contains a number of Time Controls (these are marked on the map which accompanies this program). You must drive through each time control in order to complete a stage. There are a number of different routes you could take to get through each Time Control. It is up to you to use your navigation skills to choose the best course.

Many years ago at the start of the 25th Century, an elite fighting force was set up to protect Earth from invading life forms. Earth was rich with new elements used in time travel and the only natural planet where they were to be found. These elements were so valuable it was decided to transport them to storage planets protected by orbiting space stations and Solar Warriors. The location of these planets was kept secret for hundreds of years, and the Warrior force was not needed.
Now, in the year 2650, the locations of the planets have been divulged to Earth's enemies. You are the only Solar Warrior left. You and only you can protect these planets. You will have to fight the orbiting space station and transfer to the landing craft. Once on the planet you must destroy the enemy who is trying to steal the supplies.

Tobruk

July 1942
After months of fierce fighting in the North African desert, the British and Commonwealth forces had taken and defended Tobruk - a key port to Mediterranean strategy and vital to any supply in the desert war. With the Axis forces pushed back to Gazala the allies began laying a vast minefield of over 500,000 mines stretching from Gazala to Bir Hacheim. Field Marshall Rommel's offensive began in May 1942. By July he had broken through the "Gazala line", retaken Tobruk and pushed the British back into Egypt. Are you that good? Tobruk - the game - is a simulation of that offensive. In the one player version you take the role of Rommel. You can also play the two player game and Amstrad owners can "network" two Amstrads for a superb hidden movement two player game (extra cable required).
In addition to moving your forces via the main map, there is an engineer and air screen allowing you to allocate forces to mine laying/lifting, tank recovery/sabotage, interdiction, air strikes and superiority. We have also included an OPTIONAL Tank simulator including driving, main gun and machine gun operation.

Trivial Pursuit

Here at last - the world's most fashionable Board Game officially comes alive on your computer.
You have in your hands the result of many months co-operation between the originators of Trivial Pursuit and a team of young, highly qualified programmers based at Oxford University.
What makes the Computer version of 'Trivial Pursuit' so special?
*Sound and music questions - can you name THAT tune? - played backwards!
Graphical questions to puzzle and ponder over. Text questions (many linked to graphics and music
*Text questions (many linked to graphics and music) to tease and amuse you
*Play Trivial Pursuit on your own or with your friends!
What it retains is the pure good fun of pursuing trivia that the whole family (Mum and Dad included) enjoy enormously.
*What is Desperate Dan's favourite food?
*Do frozen peas float?
*What is Triskaidekaphobia?
*Which members of the Royal family can vote?
*How many golf balls are there on the moon?
Do you know the answers to these questions?
If not - who cares - It's all part of Trivial Pursuit!

Tenpin Challenge

A game of Ten Pin Bowling consists of 10 frames. A player bowls twice in each frame unless all ten pins are knocked down with the first ball. This is a called a STRIKE and is shown on the score card as an X. If it takes both balls of the frame to knock down all the pins, this is called a SPARE and is shown on the score card as a /.
A STRIKE scores ten points plus the total number of pins knocked down with the next two balls. A SPARE scores ten points plus the number of pins knocked down with the first ball of the next frame. If a player fails to make a strike or a spare, only the pins knocked down are counted and nothing is carried over to the next frame.
The MAXIMUM score for each FRAME is 30. (10 points for a strike + 10 points each for the next 2 balls).
The MAXIMUM GAME score is 300. This is made up of ten strikes plus one strike with each of the two extra balls that a player receives for scoring a strike in the 10th frame. If this all sounds a little complicated don't worry. ALL SCORING IS CARRIED OUT AUTOMATICALLY leaving you to concentrate on your bowling. GOOD LUCK.

Unitrax

The year is 2410 AD. A set of nuclear work stations are becoming dangerously unstable, left deserted after World War IV finally vaporised the planet Earth in 2235 AD. You are part of an elite race started by astronauts who were not on Earth at the time of the 'Final War'. To prove your worth as a young man (and in order to get permission to marry your girlfriend Tania) you have volunteered to undertake the task of destroying the nuclear reactors on all the disused workstations.
To make life difficult, an opposing force (some believe started by rival Earth survivors, but possibly space mutants created by the electrical forces at the time of the 'Final War') have landed on the workstations to defend them. Their aim is to further destabilise the reactors, so that the workstations explode and destroy your nearby space colony. Your family, friends and Tania anxiously await the outcome.

Bloodwych

An amazing Dungeons and Dragons type arcade adventure from Mirrorsoft, featuring a labyrinthine maze concealed within a bleak castle. You must seek for four crystals, which when brought together will give you the power to rid the world of evil or plunge it into eternal darkness. Sound simple? Well, lets sprinkle in a smattering of foul creatures hell-bent on your detruction (and consumption), various human forms who may or may not help you in your quest, mysterious artifacts with ethereal powers and some mind boggling puzzles to bewilder you. As you start the game you are alone, through the game you may join three companions to your party, and the sooner the better. Remember, safety lies in numbers. Or does it?

Rick Dangerous

Watch our Harrison Ford because here comes Rick Dangerous, the rootiest, tootiest, six-gun shootinest guy this side of the Pecos. His adventures take place in far out exotic places such as Aztec temples, Pyramids and os on. He is chased by hordes of restless natives, almost skewered by spears and generally gets endless hassle from his opponents. Apart from all this the game is extremely funny and highly playable if not addictive. So grab your gun, put on your trilby and head off down the road to adventure.

Clip-On Bolle VDU Spectacles

THE PROBLEM
VDT users over the world complain about eye strain, excessive glare and general visual fatigue while operating a VDT. This condition can persist even hours after VDT operation.
THE SOLUTION
Comput-Irex is a patented, virtually shatterproof, extremely lightweight polycarbonate lens developed from space age technology.
Comput-Irex significantly reduces glare reflected from VDT screen and excessive office lighting. It also diminishes the perception of screen flickering.

Comput-Irex selectively filters blue-violet light which is the most difficult colour for the eyes to bring into focus and is believed to be a major cause of operator eye discomfort. Comput-Irex also assists in the reduction of subjective sense of screen flicker through luminance reduction.
Comput-Irex lenses combine with virtually unbreakable and lightweight nylon fashion frames for state-of-the-art fashion protective eyewear.
Comput-Irex filters out the residual radiation that can be emitted from a VDT. 100% of the UV and over 90% of the (R) while allowing maximum visible light to pass through to provide the operator with enhanced vision.

Mulitface Two +

Tape-to-disc at the touch of a button. Ridiculous, you may say, but it works every time Multiface can stop any program in its tracks and save the program from memory to either tape or disc. It's completely foolproof. Similar products have had problems with screen size, colour and even sound; Multiface can handle all these without a second thought.
That alone would have satisfied many people, but Romantic Robot has gone one step further, incorporating a memory editor. No program is safe with this: everything is out in the open, including the Z80 registers, CRTC data and any part of the memory.
Don't be fooled into thinking this will result in mass piracy, however, The Multiface unit itself must be plugged into your Amstrad to allow reloading of a program it saved.
Multiface II must be the cleverest hardware device at present -A necessity for disc owners who thought they were stuck with loading from tape every time.

Plonker Box

The simple cost effective disc organiser for today's computer users,
Today's computer programs have become so large that they will not fit onto one disc. Typically, any one program (wordprocessor, spreadsheet, database etc.) will spread onto two, three, or even four discs, prompting the user to change discs regularly.
Your desk is going to be covered with discs, and they will be exposed to the many hazards that make discs unusable, such as finger prints, scratches, dust and coffee. Having discs scattered over a desk is a dangerous practice.
The Plonker box is designed to fit onto the computer system, and neatly stack current discs out of harm's way, ready for use.
Holds all standard disc sizes:

.......STOP PRESS.......

X-Press

X-Press is an aid to Desk Top Publishing. The program is a printing and storage facility in that it allows Stop Press pages to be previewed before printing and will print pages up to 75% faster than normal. Pages can be crammed to reduce disc space used by stop press files, pages can also be crammed and combined to make foolscap pages or to increase vertical dot resolution by 25%. The package includes a comprehensive instruction manual which is easy to follow even to a beginner. Stop Press and X-Press, the perfect combination for fast, efficient Desk Top Publishing.
Code: XPRESS0001   Members £19.95   Non Members £30.00

Speech

Speech is a handy new tool for the CPC range, as the name suggests it is a speech synthesiser and, apart from being used as a separate program, it is also possible to incorporate speech into your own programs. The package consists of six main programs, the first being the Speech program itself, there is also a demo program, a simple spell checker, a Sayfile program which allows you to "SAY" document file, a dictionary edit program, and a computer based instruction manual in a program called "NOTES". With this utility it is possible for your program to give audible prompts or, for the more advanced programmer, give your games added impact with computer generated speech.
