Attention all Program Writers and Designers

Many of the programs in this brochure have been designed and written by freelance authors. We are always delighted to evaluate software or ideas sent to us, either by first time or experienced writers. Very good deals are offered for those programs or ideas we consider good enough to publish.

Coming Shortly

The next 'big' release from our in-house team will be out for all leading computers towards the end of 1986. The game is being designed and written by our hard working, loyal, sober (stop crawling – *Ed.*) team of programmers, designers, artists and musicians.

The details of the game are being kept closely guarded, but with a few well chosen bribes we managed to find out that it features the robotic crew of a spacecraft, under attack from alien creatures. You have to eliminate the aliens and regain control of the spacecraft by controlling all the crew members. – Sounds complicated!

Around about November 1986, on the C64/128, we will have **SKATE ROCK** by Richard Clarke and his team at Zig-Zag Creations. Richard recently left us to go freelance, and great things are expected of this his first big release as an independent.

Bubble Bus 'T' Shirts and Sweat Shirts
