EDOS: ELECTRONIC DISTRIBUTION OF SOFTWARE

Electronic Distribution of Software is a new way to buy games software. EDOS stores are provided with this special equipment which permits them to duplicate games for you on the spot.

This system is fully approved, and publishers receive full **royalty payments**, so it is **absolutely legal** and EDOS titles are not **pirates**. The titles are also duplicated from original masters, so you can have **protection from viruses** infecting your computer.

Every duplication is recorded within the machine, and is verified individually. Therefore games software produced on this system offers the highest guarantee against duplication error. If you have had difficulties in the past with volume duplicated software, try EDOS.

Please note that some formats of some titles may be available to order until early 1992. These titles can be ordered through your EDOS store.

HOW TO FIND YOUR GAME

- 1 — This catalogue lists all the games available on EDOS, and you can select either from this catalogue or the shelf display at your EDOS retailer.

- 3 — Additionally, EDOS offers multi format packaging where one box can represent up to ten different formats, from which you can see whether your desired format is included. The choice is shown on the top left corner of multi format products, in a colour coded box.
