FABRIQUE EN COREE

A close-up photograph of the base of a computer monitor. A white, textured foam block is positioned on the left side of the base. The base is dark grey or black plastic. A label on the right side of the base reads "CTM 640" and "MONITEUR COULEUR". Two dark grey cables are visible extending from the base towards the bottom right. The monitor is resting on a light-colored wooden surface.
