FLOPPY DISK DRIVE

0 LA vorz
für ansicht MSX 2

A custom MSX expansion board is shown on a wooden desk. The board is populated with several components: a green LED that is currently lit, three electrolytic capacitors, a small integrated circuit, and a white ribbon cable connector. The board is secured with four screws. Handwritten text in black ink is visible on the board, including "0 LA", "vorz", "für ansicht", "MSX", and "2". A white ribbon cable is connected to the board and extends towards the right, where it is plugged into a floppy disk drive. In the background, a green monitor displays "BASIC 1.1" and "Ready", and a keyboard is partially visible.
