## PULVERISEZ LA BARRIERE DES PERFORMANCES...

Ce n'est pas par chance si Konix est devenu un des tous premiers constructeurs de manettes de jeux en Europe... C'est le fruit de beaucoup de travail. La Konix Speedking avec sa prise de main révolutionnaire a envahi le marché US avec l'impact d'un ouragan !

Nous avons appliqué la formule gagnante – une construction solide et un design performant – pour notre dernière manette : la Konix Navigator.

L'ergonomie de la manette Navigator permet un contrôle total du jeu et une précision exceptionnelle. Sa forme s'adapte si naturellement à votre main qu'on en oublie sa présence... Vous jouez directement animés par vos réactions, laissant les temps de retard habituels au rang d'anachronismes !

La formule Konix est adaptée à toutes nos manettes : Predator Megablaster et la très populaire Speedking vous offrent la puissance recherchée et s'adaptent aux types d'ordinateur les plus connus.

Alors pulvérisez la barrière des performances avec les manettes de jeux Konix et ne soyez plus limités comme par le passé quand vous jouez.

**BREAK THE  
PERFORMANCE  
BARRIER...**

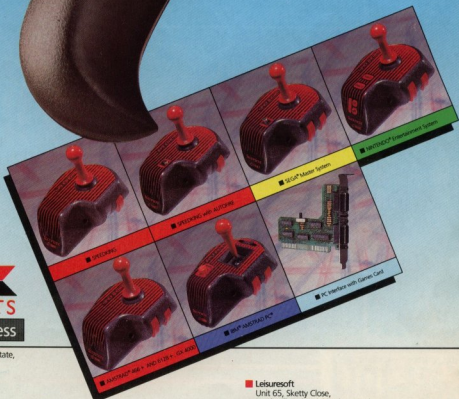

It is not by chance that Konix has become one of Europe's leading joystick manufacturers. Nor is it surprising that our products are taking the U.S. market by storm. All this is simply the result of our total dedication to customer satisfaction, through innovation and quality.

The same principles of novel design and rugged construction, so successfully established with the SpeedKing range, have been uncompromisingly applied to the more recently introduced Konix Navigator.

Thanks to its outstanding ergonomic styling, the Navigator is a perfect fit for every hand. With its natural trigger finger action, the Navigator truly achieves the ultimate in fatigue-free super-fast precision performance.

Just like the SpeedKing, the formidable power of the Navigator can be used with the most popular types of home computer, including all Atari/Atari ST models, Commodore 64, 128, VIC20 and Amiga, MSX computers, Amstrad CPC computers as well as Spectrum Plus/Plus 2 and Plus 3.

Even for the most demanding enthusiasts, you can be sure that Konix joysticks will make the performance barrier a thing of the past.

KONIX

# NAVIGATOR

The name KONIX is synonymous with success when it comes to joystick design and technology. The KONIX NAVIGATOR is a perfect example of the KONIX winning formula and it puts high scoring accuracy at everyone's fingertips. From its unbreakable precision shaft through to its ergonomically shaped grip, the NAVIGATOR spells out the magic word – CONTROL. It fits your hand so naturally that you'll forget it's there, so you can get on with the job and react instantly with devastating effect, whenever you need to.

Reaction speed barriers are a thing of the past – this joystick is part of you!
