SOFTWARE

Push-button software

Software will soon be available at the push of a button if a new invention lives up to its claims.

The machine is called Soft-Shop and is marketed by a company called Rose Tech. It stores tapes which can be loaded on the spot from a selection of at least 200 games.

The customer buys a ticket from the counter and inserts it into the machine. The Soft-Shop displays a simple set of instructions which help the customer select from a number of games on cartridge or cassette within a certain price range.

Once the customer has selected a game the machine commences loading, which is done at 16 times the normal speed, making the whole process last less than a minute.

The Soft-Shop also provides an inlay card, for the customer to fill in, and an instruction booklet.

Michael Marks, managing

Di's secrets under threat

Princess Di's spending secrets are worth £500. That's the offer made to a computer hacker by a West German magazine — rumoured to be Stern — according to a new magazine. But the 'electronic burglar' turned the offer down and Princess Di's spending habits remain a secret.

The German magazine, it said, commissioned the hacker to break in to the computerised records of Princess Di's credit cards and reveal all. He refused to co-operate and wishes to keep a low profile over the whole matter so that he can continue his hacking in private.

As a leading hacker is quoted as saying in TeleLink: "People are getting confused between computer criminals and hackers. Whereas the criminals will do it for money, we do it for the same reason that people climb mountains — because of the challenge, not for personal gain."

And Buckingham Palace praised the hacker's integrity. "It's very interesting to learn

Di's secrets

From front page

that the person concerned turned the offer down?' a spokeswoman told Home Computer Weekly, "and it was quite right that he should have refused. It's obviously an invasion of privacy."

TeleLink is a new bi-monthly magazine, costing £1, which will cover telecommunications in all its forms. Computer hacking has hit the headlines this year with incidents of youngsters breaking in to military computer systems — and of course was the theme of Superman II and Wargames.

A modem and home computer are vital pieces of equipment — then it's all down to knowhow. TeleLink affirms that these days hackers are being coaxed into preventing security lapses which are now inevitable through the skill of hackers.

Managing director of Database Publications, Derek Meakin, was enthusiastic about his new venture. "We see this publication as opening up a whole new world for micro-computer owners. People now want to widen their horizons from just playing games, and here is something really exciting and useful which can be undertaken by a micro with the aid of a low priced modem device?"

Push-button

From front page

director of Rose Tech, said: "We have enlisted the support of several software houses, and there should be some top 50 games in the selection. The first 60 should be in the shops by January or February." Mr Marks added: "By the end of 1986 we expect to have installed 1,500 machines."

W H Smith has agreed to take one of the machines on trial and several other major companies are interested including Dixons, Menzies and Heron Garages.

Soft-Shop tapes are equipped with an anti-piracy device, a feature which similar machines under development are said to lack. Mr Marks said: "We are the only company with an anti-copying system."

Mr Marks is convinced that the machines are totally reliable. He said: "It is extremely important because if they are not, the shop would be left without stock. The printers are the same ones used in the cash-point machines, and all the other parts have a history of reliability as well."

Games from down under

There's an Australian connection at Interdisc: The company which published Hercules has now negotiated with Simulated Graphics of Melbourne and will be releasing four Commodore 64 games at the beginning of November. The games will be launched under the joint title of Simulated/Interdisc.

Of Black Knight, Interdisc says it's "the greatest animation ever seen, with 16 sprites being used to move one character." African Safari "makes Hobbit look like a dwarf," according to Interdisc, while Star Force/Gammeron is "a double barrelled shotgun of purist space action." It's a twin-pack of shoot-'em-up games, and all three packs will cost £9.95.

Interdisc, Kensaltown Works, 249-251 Kensal Rd, London W10 5DS

Koala bonus

Audiogenic has now provided extra incentive to buy the Koala Pad: standard extras now include the Koalaprinter utility and the Koala Instant Programmer's Guide, as well as Koalaprinter software.

Available for the Commodore 64 exclusively through Audiogenic, the package costs £79.95 and is available with cassette or disc. A new modification is that circles will now be truly circular instead of elliptical.

The Koalaprinter allows you to print out your graphics, while the programming guide describes how you can use the Koala Pad as an input device in your own programs.

Audiogenic, 39 Suttons Ind Park, London Rd, Reading, Berks RG6 1AZ

Wally behind the wheel

With the increasing competition between software houses to sell you their software, Mikro-Gen has moved into the field of sponsorship with its own racing car.

Mikro-Gen's car has successfully entered the Belgium Mandes Championship and the Belgium Glosso Championship. Wally Week, Mikro-Gen's star of Pygamarna, said: "I have been known to lend a hand with the actual mechanicals, but I

have had great difficulty finding nuts to fight my spanner!"

Mikro-Gen, 44 The Broadway, Bracknell, Berks

Wally tunes the engine

Row over Chiller rights

A controversy has blown up surrounding Mastertronic's best selling game Chiller for the Commodore 64.

Rocksoft, a company formed to protect musical publishers and their copyrights, has issued a statement claiming that Chiller has been withdrawn and a substantial out of court settlement has been agreed between the two companies.

Rocksoft claims that the soundtrack of Mastertronic's game is so similar to the Michael Jackson hit Thriller that it cannot be a coincidence. Rocksoft says that Mastertronic used the Thriller music without obtaining a licence.

Mastertronic is adamant that none of this is true. Frank Herman, chairman, said: "It has been brought to our attention that the computer sounds produced in this program are similar to the music copyrighted by Rondor Music called Thriller. Therefore

we have agreed to negotiate a royalty in respect of this, and to use different music so that we don't infringe anyone's copyright."

Peter Jones, Mastertronic spokesman said: "At no time has the game been withdrawn. Rocksoft's statement is totally untrue."

Martin Alper of Mastertronic continued: "It is categorically denied that we agreed out of court settlements. We take great exception to their statement — what we have done is agreed to pay royalties on the games sold so far — but we have now changed the theme music on the game anyway."

Martin Humphrey, Rocksoft's general manager, said that if Mastertronic has changed the music then the game no longer concerns Rocksoft. However, he added: "I do not call it royalties because they are supposed to have a licence before they use the music."

Mastertronic's Chiller is the showpiece of the £1.99 range of

budget priced software and the game's sales have already topped the 30,000 figure.

Mastertronic, Park Lorne, 111 Park Road, London NW8 7JL

Rocky Horror Show

After Activision's announcement of a game from a new cult movie, *Ghostbusters*, CRL has announced its plans to release the game version of a very long-standing cult film, *The Rocky Horror Picture Show*.

Notorious, particularly in the States, for its following of devotees who dress for the part and sing and dance along with the show, the *Rocky Horror* (film) show has been a box office success for many years. CRL is obviously intending to latch on to that fervour with its game.

Cement Chambers, CRL managing director, said: "Films such as *Saturday Night Fever* were a hit when they were an X, but they were also successful when they were awarded an A-certificate. The *Rocky Horror* show can make an entertaining horror game without actually portraying all the horror."

Transvestism and bondage were portrayed in the film, and the game will have to be watered down for a home audience. CRL also has the rights to the *Magic Roundabout* and *Terrahawks*, the updated version of *Thunderbirds* and it is clear that licencing deals are becoming increasingly important not only for CRL, but also a number of software houses.

CRL, 9 Kings Yd, Carpenter's Row, London E15 2HD

Modem for £50

Unicom has announced the launch of its full facility modem, costing 49.99. Features include: auto dial, auto redial, auto answer, auto band rate scan, full duplex, half duplex, bulletin board capability, number memory store, compatibility with all UK, USA and European standards, power supply, leads and manuals.

Unicom claims that the modem is easy to understand and use. It automatically redials until connected and you can dial your own or other micros by remote facility to upload or download software.

Unicom, 20 Orange St, London WC2H 7ED

Unicom modem

Quest for perfection

Launched to compensate for the deficiencies of the QL, Quest's executive series is intended to make the QL a much more attractive proposition for the small business user.

Memory expansion units, storage devices, assemblers and compilers, as well as business software, are all available at a price which will mean that the QL can be used as a "serious" business machine for £500, according to a QL spokesman.

Also available is a service agreement which will enable the user to come back to Quest with problems and queries — a back-up service not possible with computer shops.

Quest, School Lane, Chandler's Ford, Hants SO5 3YY

Commodore backs schools quiz

Commodore has pledged its sponsorship for the 1985 British Computer Society Schools' Computer Quiz.

"Commodore is delighted to be associated with the British Computer Society," said Mark Horne, Business and Education Manager for Commodore. "The quiz demonstrates our mutual objective of helping schools to own their own computers, ensuring that children, whatever they study, have the opportunity to master the mysteries of the micro at an early stage."

What you have to do is enter a Top of the Form-type quiz.

Each school must select a team of three pupils with ages ranging from under 15 to under 17.

Local area heats will begin in November and 40 area finalists will receive a Commodore communications modem. Next step is the regional finals, of which eight regional winners will get CBM 64 computers and 1541 disc drives.

From the national final, due to take place in July 1985, will emerge a first prize-winning school, and the star prize is £1,600-worth of Commodore equipment.

Derek Harding, secretary general of the British Computer Society, said: "The BCS quiz has grown dramatically during the last two years, and now with Commodore's support it will become a major national event, bringing the world of computers closer to young people."

Commodore sees the quiz as an ideal opportunity to promote its commitment to more computers in schools. Its total sponsorship amounts to over £50,000.

British Computer Society, 13 Mansfield St, London W1M 0BP

Budget software

Another software house has announced that it will be selling software at £1.99. Micro Mart Software has announced a range of 10 titles for Spectrum, Commodore 64 and BBC.

Errol Dyer, senior partner, said: "We are the first software house to publish educational software at budget prices."

Micro Mart has the backing of a large European company and its range will be distributed throughout Europe.

The first 10 programs will include three educational titles, five arcade games, one graphic adventure and a family game.

Micro Mart Software, 84 New Rd, Kidderminster, Worcs DY10 1AE

Raffle for the QL

The next ZX Microfair will be held at Alexandra Palace on the weekend of 17-18 November. It's the 14th Microfair and features over 120 exhibitors.

Help a London Child, the charity sponsored by Capital Radio, has a stand and is selling raffle tickets for over £2,000-worth of computer equipment. Richard Allinson will present the prizes on Sunday 18th November, and all proceeds go to charity.

New software

Highway Code, a new CRL program for the Spectrum and Commodore 64, has gained the approval of the Automobile Association.

The program, which costs £5.95, consists of more than 100 questions and the user is given a percentage rating on the answers.

Graphics illustrate road signs and traffic situations.

CRL, 9 Kings Yard, Carpenter's Road, London E15 2HD

The ZX Spectrum
Expansion System. Only £99.⁹⁵

Sinclair's complete alternative to floppy discs...

The ZX Spectrum Expansion System contains:

- One ZX Microdrive
- One ZX Interface 1
- One wallet containing four programs on Microdrive cartridge
- Microdrive demonstration cartridge
- One blank Microdrive cartridge
- Full documentation
- Connecting lead for Microdrive/Interface 1
- ZX Net Lead

The new ZX Spectrum +

Fully compatible with all Spectrum software and peripherals, including this Expansion System

Tasword Two word processor

Turns your ZX Spectrum into a high-quality word processor!

Tasword Two has all the essential features of professional word processing packages—move and copy, insert, margin settings, 'help' pages, find and replace, and much more.

Written by Tasman Software Ltd.
Usual price (RRP): £13.90.

Masterfile filing system

Address lists...personal files...stock inventories...stamp or album collections...club records...recipes...if you can file it, you can Masterfile it!

Masterfile is a menu-driven filing and retrieval system of immense power. Display formats are user-defined, so the range of applications is enormous.

Written by Campbell Systems Ltd.

Usual price (RRP): £16.95.

Games Designer

Now, all you need to create original games are original ideas—and Games Designer! It has eight, very different, pre-programmed games for you to play as they are—or modify out of all recognition!

There's never before been an easier, more enjoyable, way into games design.

Written by Quicksilva Ltd.
Usual price (RRP): £14.95.

Ant Attack

The all-time classic 3D strategy game. Ant Attack combines stunning Escher-like graphics with fast-moving action and a real tactical challenge.

Your task is to enter the walled city, seek out your captured partner, and escape. At all times you can choose from four angles of view. But beware: the city is patrolled by giant ants...

Written by Quicksilva Ltd. Usual price (RRP): £6.95.

All programs run on a 48K Spectrum or Spectrum+. Recommended retail prices are for each program on cassette.

...includes this great set of Microdrive programs!

The unique ZX Microdrive system sets the Spectrum apart from all other home computers.

It gives you all the advantages of floppy disc drives—at a fraction of the cost. And tests show the Microdrives are faster than some disc drives.

Now, the complete Microdrive system comes in one package—together with four of the best-ever Spectrum programs, on Microdrive cartridges.

This software alone would normally cost you over £50. Yet the Sinclair price for the complete ZX Spectrum Expansion Pack is just £99.95!

You'll find full details of its contents in the panel opposite.

ZX Microdrives—another Sinclair first!

The ZX Microdrive is a revolutionary fast access/mass storage device. And it's the only truly affordable alternative to disc drives...

● Loads or saves up to 85K of program or data from Microdrive cartridges.

● Just 3.5 seconds to access a typical file.

● Only 9 seconds to load a typical 48K program.

The ZX Microdrive cartridge—a unique storage medium.

Smaller than a matchbox, the ZX Microdrive cartridge packs in a massive amount of data and programs.

Each Microdrive cartridge holds at least 85K bytes of data or programs (that's 30 pages of A4 text). And you can store up to 50 different data files per cartridge, identified by titles of your choice.

Every cartridge comes in its own protective case. Simply remove the cartridge, slot it into the Microdrive, and it's ready to use.

ZX Interface 1—adds powerful new capabilities to your Spectrum.

ZX Interface 1 connects to the back of your Spectrum and controls up to 8 Microdrives. (Additional Microdrives are available for £49.95 each.)

It also gives you:

● An RS 232 interface—to link your Spectrum with full-size printers, other

computers using RS 232 (the industry-standard interface) and provide data transmission over telephone lines, via modems.

● ZX Net—lets you set up a local area network of up to 64 Spectrums, for high-speed data communications between you and Spectrum-owning friends.

At your local Sinclair stockist—today!

The ZX Spectrum Expansion System adds an exciting new dimension to Spectrum and Spectrum+ computing. At £99.95 it's superb value too.

To find out more, call in at your local Sinclair stockist now!

Awesome *in its conception*

Brilliant *in its depiction*

Dynamic *in its execution*

The world you are about to enter bears no resemblance to any arena you ever encountered before. Weapons are of no avail in this small habitat.

The only sources of protection at your disposal are quick wits and fast reflexes. The only reward is to survive against monsters of unbelievable ferocity and cunning, and to avoid hazards more perilous and deadly than any you might find on a trip through the outer universe. This is the real world, populated by the creatures of our own inner universe, where nature is red in tooth and claw. Brace yourself now, and come with Starcade into the still water and deceptive calm of the **SAVAGE POND**.

Telephone: 01 437 0626

Three educational titles from Kosmos: The French Mistress, The German Master and The Spanish Tutor, have been released for the Commodore 64, joining the versions for the BBC, Electron and Spectrum. Each language is covered by two cassettes and they cost £8.95 each. Conversions for the MSX range, Amstrad and Dragon are to follow early for next year.

Kosmos, 1 Pilgrims Close, Harlington, Dunstable, Beds LU5 6LX

New from Channel 8 for the Commodore 64: Time Zone, a fast-action shooting game, Phase 4, which is four arcade games in one, and Borzak, converted from the Spectrum. All cost £6.95. Channel 8 says that the Mysterious Adventures series can now be supplied for the Atari, BBC, Sord M5, Commodore 64, Dragons, Oric/Atmos and Spectrum.

Channel 8, 51 Fishergate, Preston, Lancs PR1 8BH

Quango, Guzzler and Plummet are new releases from Interceptor Micros. Costing £7 on tape and £9 on disc, they are arcade games. Quango "is guaranteed to damage wrists and joysticks alike"; while Guzzler is a family maze game (both for CBM 64) and Plummet is a Spectrum game in which you must save

the mayor of New York who is stranded in a lift shaft.

Interceptor Micros, Lindon Hse, The Green, Tadley, Hants

Android Dreams is the name of a new software house which has just released Expert Sprite Editor for the Commodore 64. According to Mr Bryan, managing director, "the package is very comprehensive and suitable for both expert and beginner games writers."

Android Dreams, 94 Rednal Rd, Kings Norton, Birmingham B38 8DU

Xavior, due for release on November 19, is PSS's new Spectrum title. There are 4,096 rooms through which you must progress, killing the 256 different monsters. Your aim is to collect DNA fragments deposited in the gene room, and ensure the survival of the species. Price: £5.95.

PSS, 452 Stoney Stanton Rd, Coventry CV6 5DG

Pick of the pops

It's often said that there are numerous parallels between the record industry and software and here's another new area in

which the two fields are similar: compilation tapes.

Computer Records is a new software house which has released Select 1, a compilation tape featuring 12 hit games. Included on the cassette are Hunchback, Kong, Hexpert and Skramble. Adventures such as Denis through the Drinking Glass, from Applications Software and Ring of Fire from Quicksilva are also included on the tape.

To quote Computer Records, "As well as offering excellent value for money, Select 1 gives both the first-time buyer and the hardened games player a unique opportunity to add 12 respected titles to his or her collection at one stroke."

The price of this compilation tape is £12.49 and it's available for both Commodore 64 and Spectrum. Select 1 is being marketed in conjunction with Telstar Records, a TV record merchandising company. A national TV advertising campaign costing £500,000 will support the promotion.

The Commodore compilation tape features the Burner speed-loader system, while the Spectrum version comes with indexing software which enables you to locate and load the game automatically.

Select 1 is concentrating on Commodore 64 and Spectrum, with the hope of selling 100,000 tapes before Christmas. Neil Palmer, director, said that the games are exactly the same as

if bought individually. The difference is that £70-worth of software is being sold for less than £13.

"Computer game compilation tapes were an obvious expansion for Telstar," said Mr Palmer. "It's our policy to give value for money!"

Computer Records, 21 Napier Place, W Kensington, London W14 8LG

Robot kit

You may well know the name Fischertechnik from TV advertising for children's toys. Now the company has released a computing package from which you can build a robot.

For £64.95 you can buy all the components necessary to build one of six different robot forms. The six forms comprise: a telescopic "teach-in" robot arm; graphics board; simple sorting machine; lifting and sorting robot to solve the legendary Buddhist problem of the Tower of Hanoi; plotter which utilises polar coordinates and a tracking mechanism for keeping a solar cell in the correct alignment with the path of the sun.

Most popular home computers can control the kit with an appropriate interface.

Fischertechnik, Fischer Hse, 25 Newtown Rd, Marlow, Bucks SL7 1JY

New robotics kit from Fischertechnik

Platform 5 for computers

W H Smith is expanding its computer shops with the opening of its first branch at a railway station. Opposite platform five at Waterloo, the shop will stay open from 8 am to 8 pm from Monday to Saturday.

Michael Witter, the 22-year-old manager of the Computer Shop, said: "We're very excited about this venture. About 180,000 travellers go through Waterloo station each day and we hope to attract many of them."

Four fully-trained staff will be on hand to offer advice and computers available include Spectrum+, QL, BBC, Electron, Commodore 64 and C16 and MSX, as well as peripherals and software.

MSX starter packs

Thorn EMI has announced it will be offering starter packs for the MSX. The range of three packs include both new and converted programs for

entertainment, education and business.

"MSX is a new system with software new to all dealers, and many MSX dealers are new to the micro market," said Henry Kitchen, marketing manager. "With the starter packs we are giving the reassurance that all the software is of a high enough standard to meet the Thorn EMI Computer Software Division's requirements."

The games pack includes PSS's Les Flics, Hustler from Bubble Bus, Quicksilver's Fred and Alligata's Blagger.

Thorn EMI, Thomson Hse, 295 Farnborough Rd, Farnborough Hants GN14 7NF

Briefly

A computer auction is being held at the Bonnington Hotel in Southampton Row, London WC2 on November 28 at 6 pm. Organised by Crocker Computer Auctions, entries are being accepted from shopkeepers as well as the public, and various personal and business machines will be on sale.

Crocker Computer Auctions, 154 Tottenham Ct Rd, London W1

Jack in Magiland is new from Turtle Software. It's an educational text adventure aimed at the 7-12 years age group and has its basis in Jack and the Beanstalk, with appearances made by Aladdin, Ali Baba and others. More than 100 locations are included as well as a parent/teacher guide and a book of cartoon illustrations. Price: £6.95.

Turtle Software, Wychwood, 40 School Rd, Finstock, Oxford OX7 3DJ

Volcano for the 48K Spectrum is Computer Magic's launch title. You must escape through the streets to the safety of an island where the molten lava cannot reach you. Price: £7.95.

Computer Magic, 39 Bridge St, Walton on Thames, Surrey

Sterling software is releasing Orpheus in the Underworld for the Commodore 64. It's an arcade/adventure which involves a treasure hunt through 120 different screens. Price: £6.95. Country Cottages, also from Sterling, is for the Spectrum and Amstrad and is a two-player strategy game about

property. Price: £5.95 for Spectrum, £7.95 for Amstrad. Assignment East Berlin completes Sterling's autumn line-up: this is a text adventure for the Spectrum, costing £5.95.

Sterling Software, Garfield Hse, 86/88 Edgware Rd, London W2 2YW

Kuma has brought out a cassette-based Spread Sheet Calculator for the Commodore. At £14.99, the program complements Kuma's Database and Simple Accounts and includes a manual.

Kuma, Unit 12, Horseshoe Pk, Horseshoe Rd, Pangbourne, Berks RG8 7JW

Projector 1 is a business graphics, forecasting and presentation system for the 48K Spectrum. This Microdrive-compatible cassette comes complete with user manual included in the purchase price of £13.95.

Mc-Graw Hill, Shoppenhangers Rd, Maidenhead, Berks SL6 2QL

Plumber's nightmare

Connect the tank to the tap with 56 pipes. Sounds easy? You'll need logic and patience in this tricky game
by S. T. Neill

This game is based on those puzzles often found in Christmas crackers, where a tray full of tiles with one missing is rearranged into a set pattern by moving one tile at a time into the empty space.

In this program, in order to avoid repetition, more tiles are used and not all the pieces need to be used or even moved.

The game features:

- 1 variable border, screen and print colours
- 2 hall of fame for top scores
- 3 automatic scoring and deletion of scoring tiles after the game.
- 4 four skill levels
- 5 redefinable control keys

Pieces are selected at random before each game. You must pick:

- 10 vertical straight pipes
- 10 horizontal straight pipes
- 36 right-angled pipes (9 of each kind of bend)

The program should convert very easily to any micro with a 40 x 25 screen display as the BASIC is very straightforward. In general, screen and colour POKES would need to be changed.

I hope this game will be a welcome, quiet break from 'zapping' and 'mazing' games, but be warned: it's not as easy as it sounds and can lead to frustration.

Maximum score if you use all the pieces is 58,000.

How it works

10 dimension arrays
20-40 initialisation routines
50 set blank space
60-90 main loop for moving pieces
1000-1120 change control keys routine
1130-1150 read data for pieces routine
1160-1180 set piece positions array routine
1190 read data for type of piece routine
1200-1310 change colours routine
1320 change character colour for entire screen routine
1330 print pieces at start of game routine
1340 print wait message routine
1350-1510 print top scorers

routine
1520-1530 get player's name routine
1540-1660 evaluate and print piece routine
1670-1730 random selection of pieces routine
1740-1820 determine and execute player's move routine
1830-1920 select skill level routine
1930-2120 title page routine
2130-2200 print tank and tap routine
2210-2280 score and replay routine
2290-2390 calculate score and remove piece routine
2400 copy duplicate array routine
2420-2540 DATA

Variables

J%(A) array holding piece type
J1%(A) duplicate of J% to avoid rereading data
P%(A,B) array holding screen positions of pieces
S%(A,B) array holding type of piece at P%(A,B)
K%(A,B) array holding data for printing pieces
GT(A) array holding top scores
GTS(A) array holding top scorers
F(A) duplicate array for determining top scores
FS(A) duplicate array for determining top scorers
X,Y current position of blank space
ML number of moves remaining
US,DS,RS,LS strings holding key to be pressed for movement of pieces
SC,BO,PR screen, border and character colours
G% intermediate variable for determining type of piece
GT score
TH,Q flags used in calculating scores
U,A,B,T,G,H used in for...next loops
KPS last key pressed

In the top left corner of the screen there is a tank which must be connected by the pipes on the tiles to a tap in the bottom right corner.

The tank and tap can be connected by as many pieces as necessary. The more complex the route, the more points scored. Bonus points are awarded if the tank to tap connection is made.

The number of moves available is limited but your time isn't, so logical thinking is needed.

Rainbow TI-99/4A £3.20

Softi, 14 Station Rd, Brough, N
Humberside HU15 1DY

This is an educational program described as being suitable for four to eight year olds, although I would find it hard to imagine that it would retain the interests of children over seven.

The computer draws a picture of a boy, girl and dog in a field. Their clothing and other items in the field are assigned colours. After a description whilst the picture is drawn, questions are asked on what colour an article is.

If the answer input is correct, then a sweet is drawn in a box. When ten questions have been answered, the colours change and the questions are asked again. When 20 sweets fill the box, the game ends.

Although great care has been taken to redefine a complete character set so that questions and statements are written in lower case lettering, the answers need to be entered in upper case. This is because typing with the alpha lock off causes the stems of letters to be omitted, making orange appear as oranae.

Also a problem on my TV was trying to distinguish the colours of smaller items.

Clever Cloggs — History Mystery 48K Spectrum £7.95

Argus, No. 1 Golden Square,
London W1R 3AB

The Clever Cloggs tapes are described as Early Learning Games. History Mystery is aimed at the five to 12 age group.

The two younger members of my family were recruited to assess this tape. From the hours they spent using it and the laughter, they gave it their approval. What is more, they learnt and remembered facts, so it served its purpose as well.

History Mystery will take you to Biblical times, and the lands of the Middle East. Clever Cloggs is the character you guide round these lands retrieving the

treasures of the past. The game has five levels to allow the child to learn the techniques of playing and providing clues on where treasures can be found. Further clues are provided with references to the Bible.

As the child's skill level increases, fun is brought in with robbers who are out to get the treasures. Excellently drawn maps of the Middle East, Israel and Jerusalem, plus amusing camel and whale rides complete a well produced game which will amuse and educate. An ideal combination!

Tiny Code Development System 48K Spectrum £5.50

Amazing Games, 39 Maple Dr,
Burgess Hill, W Sussex, RH15
8EX

Tiny Code is for programmers with a knowledge of BASIC who wish to learn Z80 machine code, and is supplied with a manual explaining each Tiny Code command.

It is a simplified version of Z80 assembler, with the most difficult commands omitted. If an error is encountered in a program, an error message is displayed, unlike actual machine code where a mistake crashes the computer, obliterating the program. This useful error-trapping facility makes programs run slowly. They are much slower than BASIC, because this system is written in BASIC! This makes the inclusion of non-machine code instructions difficult, because the only reason for using Tiny Code is to learn machine code, as Tiny Code programs are very slow and restricted.

The program is slow to respond and the editing is poor. When programs are executed you have the option of a display of the registers and/or single stepping through the program.

Tiny Code is a cheap introduction to machine code, but it won't save you buying the introductory course, assembler and monitor which are essential if you are serious about learning.

Utilise your education

Here's a selection of utilities
and educational programs for
you to choose from. Read our
reviews before you buy

Games Creator CBM 64 £12.95

Mirrorsoft, Holborn Circus,
London EC1P 1DQ

Programs enabling computer owners to create their own masterpieces are becoming more common. This package enables you to create arcade games of the maze or scrolling type.

The program loads using the ubiquitous TurboLoad and on running presents you with a menu. There are editors enabling you to define sprites, scenery, music and sound effects. The sprite and music editor are good enough to warrant release in their own right. Once you've designed the protagonists, there are options for defining the rules of movement, collisions, speed of animation and movement and other parameters.

The games you can write are

limited. You can only have one screen and there can only be up to five aliens on screen at once. In spite of these limitations, the three demonstration games are playable. I see the market for this package as the younger owners of 64s who want to write good games without learning machine code. Real games fanatics may prefer an alternative programming language.

This program won't turn you into Jeff Minter but it's great fun to use and well worth a close look.

Finance Manager 48K Spectrum £19.95

Oxford Computer Publishing,
P.O. Box 99, Oxford

Although this program is aimed at both business and household accounts, it has been my experience that most household accounts can be entered in a small note book, in my case a very small note book.

The odd thing is that it is the householder that is most likely to have a Spectrum. If you happen to be a business person, and a householder with a Spectrum, then this program might be just the thing for you. Especially if you run a small business, or are self-employed.

The package comes complete with comprehensive instructions by way of a booklet, which, unless you are a financial wizard, you will have to study carefully. All cash entries are a single entry, either plus or minus, and the program automatically converts to double entry.

The program is very user friendly, and maintaining multiple accounts is easy with the SAVE and LOAD options. In fact, given a reasonable knowledge of accounting, this program, a Spectrum, and a decent printer, this could be the basis of a good business for some enterprising person.

In my opinion value for money, and could pay for itself in certain circumstances.

Redefine your characters

This utility by Chris Southall gives you a total of 116 user defined graphics. You can also run it on a 16K Spectrum — see the hints on conversion

This program is basically a character generator, but has the advantage that it will redefine the whole character set and not just the 21 user defined graphics, giving a total of 116 UDGs.

The program works by holding the data for the graphics in high memory and altering the system variable CHARS to point to the new character set. It also has the added advantage that the graphics produced by it are recognised by SCREENS, meaning that the games programmer doesn't have to play around with the complex commands such as ATTR and point.

Variables

d code of key pressed
d\$ character to be defined
p y coordinates of "X" cursor
n,a\$,s\$,u,k,g\$ temporary variables

How it works

11-15 POKE Sinclair Set into high memory
17-41 instructions
43-45 get character to be defined
47-71 screen set up
73-93 reads keyboard
81 saves new character set
113-145 POKEs character set into memory
147-163 prints new character set onto screen
165-175 resets character set
177-205 edit a character

Hints on conversion

This program is hard to convert as most other micros store their characters using a different system. The program as listed will only run on the 48K Spectrum:—

Change 51200s in lines 13, 81, 127, 171 to 30720
Change 200s in lines 41, 131, 147, 187 to 120

Robin Hood TI-99/4A £7

Stainless Software, 10 Alstone Rd, Stockport, Cheshire SK4 5AH

This program comes in two parts. The first program loads the graphic character definitions, and loads and runs the second. If you have a disc system you must use CALL FILES (1) before program one, otherwise program two won't load.

The textual character set is unusual but readable, and offered continuous background music, using a recently-discovered programming technique. I preferred the silent option. The game may be played using either joysticks or the keyboard, but not both.

Robin Hood is pitted against a variety of objects. The first is an archery target and subsequent

mobile objects. They include the Sheriff's men, deer, and a falling apple.

The game is demanding, requiring you to visualise the trajectory of the arrow, taking into account wind speed and direction (indicated by clouds) and the bowstring tension which depends upon the length of time that the 'fire' key is held down.

I found it a difficult and frustrating game. Ten misses, each losing you five points, result in Robin's untimely demise. Unlike the original, this one has three lives, and you'll need them.

This program needs 32K and Extended BASIC. P.B.

The Crystal Frog 48K Spectrum £5.95

Kerian, 29 Gisburn Rd, Hessele, Hull HU13 9HZ

A simple, one line, black and white loading screen leads to the instructions of this non-graphic adventure game that uses the standard size Sinclair character set.

You use the computer as eyes and ears in your quest of the Crystal Frog and return to the start in a small clearing in a field. Lengthy, poetic descriptions appear for each location — to score 100% you will have to visit all the locations and use certain objects. These will be found as you follow paths through the countryside, a castle and tunnels.

Seven words are given on the

insert and you must discover the vocabulary as you travel. Any time the computer expects a command, you can SAVE the game to be played later — should you so wish.

After 39 turns I was being attacked in a tunnel and sustained a cleaver to the head. I was never more relieved to die than at this point — even though I had scored 0%.

Objects did not appear easily. Where are they are what are they? A slightly boring, non-addictive game. T.W.

Peter Pan 48K Spectrum £9.95

Hodder and Stoughton, 47 Bedford Sq, London WC1B 3DP

The arrival of a game called Peter Pan caused some excitement in my house. What could be a better game than a story that has enthralled youngsters for generations?

The packaging is impressive. The case has a bright picture of Peter Pan and Captain Hood on the front. Inside, alongside the cassette, is a copy of the story in paperback. If you are not familiar with the story, you are advised to read the book before playing.

The promise is maintained as you load the game. Another well-drawn scene is displayed as the long program feeds into RAM. However, once the game gets underway, any illusion about it being special is dispelled. It is an ordinary text adventure, with simple scenes at the top of the screen to depict the location of the point reached in the adventure. Some real-time prompts have been added when some urgency is required in making a decision.

Still, if you are an adventure game freak, then the classic battle between Peter Pan and Captain Hook should enthrall you. D.N.

Peter Pan meets Robin Hood

You can now take the part of
one of these famous heroes.
Our reviewers have picked out
the best

Castle of Gems 32K BBC £5.70

MRM, 17 Cross Coates Rd, Grimsby DN34 4QH

I watch each new release from this company very carefully, for most of their games are chart toppers and sold at a very reasonable price.

In this game you are changed into Bertie Bear and go around the screen collecting gems.

There are the usual numbers of chasers of all types: trees, gremlins, gem gobblers, ghosts and witches. The difference from a normal walk around game is in the backgrounds. They are a maze of passages but represented in a three dimensional manner.

There are lifts, that only you can use, to the higher levels. There are magic hats to make you invincible for a short period

and you can attack the gobblers when they are eating a gem.

The interesting graphics are one of the distinctive features of this program. Plenty of colour, speed and sound effects give a well polished feel to the whole thing. The final feature of note is the inclusion of nine screens in each of the programs and as there are two of these that means you have 18 to complete in all.

Kentilla 48K Spectrum £6.95

Micromega, 230-236 Lavender Hill, London SW11 1LE

Kentilla is a graphically illustrated adventure, written by Derek Brewster. This is written in very slick machine-code, with a sophisticated input interpreter, which allows not only good sized sentences, questions and speech, but also the facility to look into a new location before you get there.

The illustrations are rather small but stylish and swiftly drawn, and the text presentation clear and colourful.

Whether you find it addictive or not depends on your taste in plots. This one has you cast in the role of the potential saviour of the universe boldly going in Caraland to seek the demonic being Graka who has within his grasp the Moonstone of Algrath.

Carrying, if you can find it, Kentilla, the sword of the mighty warrior Ashka, you'll soon be assailed by creatures whose names are so long and obscure, that by the time you have deciphered them and tried to say hello to them, they've attacked you at least, and quite possibly killed you.

Very nicely executed, but prefaced with Micromega's new anti-pirate loader which appears to be rather slow. D.M.

The aliens are coming

The freedom of the galaxy is at stake and you, the pilot of a lone spaceship, must do battle with the dreaded alien invaders. There's plenty of action and no time to think in this game by Marcel Melito

If you like zapping aliens then you'll love this game. The aliens are coming and only you can stop them.

Far above the planet earth in the hostile infinity of space your tiny ship battles against the hordes of alien invaders emerging from their mothership and hurtling toward you intent on destruction. You have only one laser against their vast

Variables	
S	score
LI	lives
G	ground
B(2)	bombs
X,Y	position of bomb
S(4)	warships' locations
UP,DI	warships

armoury of weapons and only three lives before your ultimate end. The game requires fast reactions and great skill. As

time goes by the numbers of your adversaries increase and the fight becomes more bitter.

The keys that you will need are Z which moves you left, C right, and, most important, M which fires your laser.

How it works

THE
6809
COLOUR SHOW

FOR DRAGON AND TANDY USERS

**SATURDAY 17TH AND SUNDAY 18TH NOVEMBER
 10 A.M. UNTIL 6 P.M.
 THE ROYAL HORTICULTURAL HALLS**

If you own a Dragon or Tandy colour computer this is **your show**.

The **first ever** show organised in the United Kingdom for these machines.

All the very latest **hardware, software, interfaces and peripherals** will be there. Your chance to get up to date, try and buy **all thats new**.

We'll also be organising events and competitions with **great prizes**. The manufacturers will be staffing **advice centres** to help with all your queries.

Exhibitors will have **special offers** on their products so you can **save money** too!

Large gangways and comfortable rest areas will make sure you can see everything and sit in comfort when you want.

This will be a show for the **whole family**, plenty to see and plenty to do.

If you want to miss the queues just clip the coupon below.

Computer Marketplace (Exhibitions) Ltd. Part of the Rushworth Dales Group, 20 Orange Street, London WC2H 7ED.

HOW TO GET THERE

The Royal Horticultural Halls are just off Victoria Street a few minutes walk from Victoria or Parliament Square.

Buses 11, 24, 29, 70, 76 and 88 run up Victoria Street.

Mainline stations; Waterloo, Charing Cross and Victoria.

Underground stations; St. James park (District and Circle lines), Victoria (District, Circle and Victoria lines).

There is an NCP car park in Abingdon Street, a few minutes away.

To: Computer Marketplace (Exhibitions) Ltd, 20 Orange Street, London WC2H 7ED.

Please rush me _____ (qty) adult tickets at £2 each and _____ (qty) tickets for under sixteen year olds at £1 each for the 6809 colour show. I enclose cheque to the value of £_____

Name _____

Address _____

Postcode _____ Telephone _____

6809 is the registered name of Motorola Ltd.

You'll need to think hard and carefully as this Simon-type game gets progressively more difficult. By HCW regular, Steve Lucas

In this game, the computer displays a random sequence of coloured blocks in the four corners of the screen. You must try to repeat the sequence using the keys:—

r	y
c	b

Each time you correctly repeat the sequence, it gets longer! To make the game more difficult, there is a time limit, which is selected at the beginning (1 = easy, 2 = hard).

Note: please remember to check your spacing when typing in Amstrad listings. Make sure you leave a space between the command DATA and the first datum on the line.

Hints on conversion

- 1 lower\$(x\$) converts upper to lower case
- 2 you will need to change all WHILE WEND loops to either REPEAT UNTIL loops (remembering that the condition for terminating the loop is at the start of the loop in the WHILE WEND loop, but at the end with a REPEAT UNTIL loop) or a conditional GOTO
- 3 the graphics blocks are built up as a string of CHR\$(143). You can use any character you like
- 4 replace sound commands as appropriate
- 5 LOCATE sets the text cursor at X,Y coordinates... use print tab(x,y) or print at x,y as appropriate
- 6 PEN selects colour used, PAPER selects background colour, INK selects colours of PEN from the multicoloured palette

How it works

- 30 starts random number generator at random position (dependent on time)
- 40-60 messages
- 70 multicolour mode
- 80 create block as a string of characters
- 90 select colours used
- 100 call instructions
- 110-170 select difficulty
- 190-260 main control WHILE WEND loop
- 250 increment score
- 260-300 end of game
- 310-400 select random sequence
- 410-520 display sequence
- 530-650 your turn
- 660-940 display graphics in correct positions
- 950-1060 instructions

Variables

- sc score
- m\$(x) messages
- a random sequence
- a\$ your sequence
- b\$ sequence of blocks held as string
- x check condition for loops
- ti time check
- X% difficulty
- c\$ mid\$(of b\$
- xx,xy check position in string

Exercise your memory

```

Battlezone 48K Spectrum £6.95

Quicksilva, P.O. Box 6, Wimborne, Dorset BH21 7PY

Once the game had loaded I found the display of the QS initials, and the title, very entertaining, unfortunately the game wasn't. You are in charge of a tank, with track controls left forward/reverse, right forward/reverse and fire button.

In front of you is a view representing mountains, a simulation of a RADAR PPI display, and messages informing you of the enemy's position.

The enemy consists of line drawn tanks, and some flying objects which I couldn't identify. Although the 'tank' responded to the track controls I just didn't get the feel of being in a tank.

For example, when the enemy was supposed to be behind me I used forward right only, which, I reasoned, would sooner, or later, turn me completely round, not so, the enemy was still behind me.

Again, using both left and right forward controls together should have moved me nearer the horizon, I did not move. Another thing I found was too long a delay between shots. Not one of my favourite games. **B.B.**

Motorcycle Crazy 48K Spectrum £5.95

Kerian, 29 Gisburn Rd, Hessele, Hull HU13 9HZ

You zoom past the B.S.A. factory, Selly Oak and Don Law's Scrapyard to Donnington race track as you search for the Award, so you can return it to Ariel Castle. This is an amusing graphic adventure game that sits you on a motorbike, which runs out of petrol and develops a flat tyre. As you journey past the beer tent and along a motorway you can collect four of these items: Yale key, large key, rusty key, sandwich, waterproof suit, spanner, toolkit, petrol and puncture outfit.

Each location is simply and colourfully drawn and briefly

described in words. You are told seven words understood by the program and have to find out if there are any others. You have to visit each location in order to score 100% and use certain items as you proceed.

Keep away from the Army Firing Range or you'll end up in detention. Steer clear of the quarry or you'll have an accident.

I scored 15% in 49 turns and could SAVE a played game. Although not up to present standards, Motorcycle Crazy! is quite addictive and enjoyable.

Millionaire 32K Electron £6.50

Incentive, 54 London St, Reading RG1 4SQ

Have you ever dreamed of becoming a millionaire? Here is your chance to become a millionaire over and over again.

In this game you start off as a software house with one program on the market and a rundown warehouse as your headquarters. The building changes to reflect your prosperity. You are asked to allocate 20 points to various aspects of a good program. The way in which the points have been distributed will govern how well you do. If your first choice does not result in good sales, you are given another opportunity.

There is also a news bulletin which comments on your performances. There is also a graph which displays the level of your sales. You might have to skate on thin ice and use dubious methods to boost your sales at times. To help you is a chap called Honest Harry. He always has something guaranteed to increase your sales, but listening to him can land you in court. So it is wise not to reply too much on Harry.

What I particularly like about this game is that Incentive have redefined the text, this gives the program a touch of quality. A facility to save the game position would have really made it great.

Action-packed package

If you try these games you could be a soldier, a millionaire — or both!

Zombie Zombie 48K Spectrum £6.95

Quicksilva, P.O. Box 6, Wimborne, Dorset BH21 7PY

The first thing I do when reviewing any game is to read the inlay card. Hopefully this will give an insight into the game, and perhaps give me a feel for it.

Having chosen the keyboard as my method of control, I found myself as a figure near a helicopter. The movement of the figure on the screen didn't quite match the up/down, left/right messages from the keyboard. Eventually I managed to get into the helicopter and fly off over the landscape.

Every now and then I glimpsed something among the buildings

(ruins?). When I landed an indeterminate figure approached me, sometimes I won the battle, sometimes I lost. All the moveable graphics are small, and were jerky in their movements.

After seeing many games with superb graphics animation, I got the impression that this was a small child's version. **B.B.**

Spaceman Sid BBC Model B £7.95

English Software, Box 43, Manchester M60 3AD

If I use my daughter's interest in this program as an indicator I must give the game full marks.

Spaceman Sid drives a moon buggy across a planet surface looking for Dillithium Crystal mines which have been captured by alien forces. His route is pockmarked with craters and gullies which have to be jumped over, piles of rocks and scout ships, and there are hostile, bomb-dropping spaceships which have to be destroyed.

There are other dangers such as sliding bridges and meteors but I did not have sufficient skill to reach the point where these horrors appeared.

The graphics are excellent. The wheels of the moon buggy follow the contours of the planet surface very realistically, and the screen layout is attractive with good use of colour and screen scrolling. The control keys are kept to a minimum and the aims of the game are easily understood. The game is not easily mastered and it will, at first, seem impossible to make some of the jumps, but th surely gives value for money. You soon loose interest in an easily mastered game. **J.H.D.**

MAIL ORDER PROTECTION SCHEME

If you order goods from Mail Order Advertisers in this magazine and pay by post in advance of delivery, this publication will consider you for compensation if the advertiser should become insolvent or bankrupt, provided:

1. You have not received the goods or had your money returned; and
2. You write to the publisher of this publication explaining the position not earlier than 28 days from the day you sent your order and not later than 2 months from that day.

Please do not wait until the last moment to inform us. When you write, we will tell you how to make your claim and what evidence of payment is required.

We guarantee to meet claims from readers made in accordance with the above procedure as soon as possible after the advertiser has been declared bankrupt or insolvent to a limit of £1,800 per annum for any one advertiser, so affected, and up to £5,400 p.a. in respect of all insolvent advertisers. Claims may be paid for higher amounts, or when the above procedures have not been complied with, at the discretion of this publication, but we do not guarantee to do so in view of the need to set some limit to this commitment and to learn quickly of reader's difficulties.

This guarantee covers only advance payment sent in direct response to an advertisement in this magazine (not, for example, payments made in response to catalogues, etc. received as a result of answering such advertisements):

CLASSIFIED ADVERTISEMENTS ARE EXCLUDED.

Get organized!

Tired of searching through magazines for a program you know you've seen before? P. Pantziarka's program helps you catalogue your library and put order in your life

As soon as you get a micro you find that your home starts to overflow with magazines and books. And of course sooner or later you'll want that little routine to turn your latest program into the block-buster it deserves to be, but where's the routine? It could be in any one of dozens of magazines.

This program is a simple, quick and easy to use index to help you keep track of what's where. There are of course several commercial programs available for a variety of uses and various levels of sophistication. This program is written specifically with cataloguing magazines in mind, although a few line changes could change that.

Variables

SS,TS,MS subject array, title array and magazine array
 QS query string when searching index
 NS input string used in sub-routines
 I index counter used in data entry sub-routine
 X index counter used in search sub-routine
 T maximum value of I and number of items DIMensioned
 N input from menu, also used in sub-routines

The program is auto-RUN to save the data, so if you want to examine or change the listing remember not to use RUN or you'll CLEAR the data. Use GOTO 60 instead to restart the

Hints on conversion

This program should convert easily. The size of the arrays DIMensioned can easily be increased by increasing the value of T. The size of strings can be increased or decreased by adjusting the number 15 in the DIM statements, though if one is changed the same change must be made in the other DIM statements.

program.

If you do want to wipe out your data to start a new index, option 3 of the menu will do that and return you to the menu.

It should be noted that each entry can be up to 15 characters in length. A typical entry is: Subject "PROG LISTING"; Title "CHECKMATE" and Magazine "HCW 59". To search through the index select the option from the menu and you'll be asked to enter a single item — title, subject or magazine but not more than one. Also the item must be in exactly the same form as when it was saved.

How it works

5-50 DIMension arrays, set index counter to zero, CLEAR all data
 55-90 print menu
 100-150 GOSUBs and GOTOs from menu
 200 SAVE "QUICK INDEX"
 500-690 enter data sub-routine
 1000-1290 search index sub-routine

```

ATARI PROGRAM

Imagine you're a snake — and you're hungry ...

In this program for the 16K Atari computers you control a snake which must move about in a

walled garden eating the fruit which is lying around while avoiding the different bushes — especially the semi-visible ones!

As each piece of fruit is eaten the snake's body increases in length and starts moving more quickly, thus making it more

How much fruit can you eat without touching the deadly bushes? That's the challenge from HCW regular David Ryan, whose game runs on any Atari

Conversion

Because of the machine code routines in this program it could be quite difficult to convert to other machines although the basic idea would be relatively easy to implement on other machines.

difficult to eat more fruit.

To control your snake just plug a joystick into player 1 joystick port and away you go.

Take care when entering the data statements in this listing as they make up several machine code routines in the program. One small mistake could ruin everything. Saving the program at regular intervals is advised.

How it works

MONKEY WARLOCK (BASIC) £5.95
 Guide Monkey Warlock through the Dragons Lair, collecting weapons and spells in order to defeat him. 5 screens of incredible graphics. An absolute must for every Texas owner!

HUNCHBACK HAVOC (BASIC) £5.95
 Arcade Action in TI-Basic! Race with Egor thru four castles and 24 different sheets. Superb graphics and great fun.

DADDIES HOT ROD (BASIC) £5.95
 Drive through sheep fields, woods, over rivers and avoid all obstacles then pick up hitch-hikers down perilously twisting roads.

CRAZY CAVER (EX-BASIC) £6.95
 You are the Crazy Caver and must face a myriad of hazards. Run, jump, swing on stalagmites, dodge leap over pits, arrows and balls of fire. Superb graphics and animation. A game you can't stop playing.

Buy my fizzy pop

Now's the time to take on some responsibility by running a fizzy drinks stand for a week. Peter Wiseman's program puts you into the competitive street-corner retail trade

Phew! It's thirsty work being a top lemonade seller, trying to sell more drinks than Mr Fizz across the road. Then there's Mr Bubbles round the corner, rolling in the cash with his new Triple Tonsil Tangler.

I didn't do too well last week when we had a wet spell that lasted for six days. All my posters got washed down. Do you think you can do better?

Well, now's your chance because you are taking over Fizzy Pop stall for a week. So get ordering your drinks, putting up the price list and posters, and please be nice to the customers. I don't want to return to find no customers anymore.

I'm going now for my week's holiday. Good luck! You never know, you might be a millionaire next week!

Fizzy Pop was written on a Dragon 32 taking just under 7K. Full instructions are included in the program. Just type in the program and SAVE it just like a normal BASIC program. There is a short

Variables	
M(1-3)	
AS-CS	
A-C	normal use
P(1-3)	posters
PP(1-3)	potential customers
PW(1-3)	posters washed down
E	number of stalls
D	day
TP	temperature
J	loop for stalls
W	weather
L(1-3)	number of cups of lemonade
O(1-3)	number of cups of orangeade
G(1-3)	number of cans of ginger beer
LS(1-3)	price of lemonade per cup
OS(1-3)	price of orangeade per cup
GS(1-3)	price of ginger beer per can
LL(1-3)	amount of lemonade sold
OL(1-3)	amount of orangeade sold
GL(1-3)	amount of ginger beer sold

machine code routine starting at location 31000 which is 26 bytes long. The routine is used to simulate the effect of rain

falling from a cloud. The effect is achieved by printing a raindrop under the cloud. Then they are cleared off the

How it works	
10	reserves memory for m/c
30-70	store m/c in memory
80-260	draw title screen
270-330	instructions
340-360	ask for number of players
370-380	set up variables
390-460	print the day
500-730	buying routine
740-890	print players stock
820-930	input prices
940-1320	draw weather graphics
1210	plays Singing In The Rain
1300	plays The Sun Has Got His Hat On
1320	plays tune for cloudy weather
1330-1460	print weather and temperature
1470-1670	work out how much drink sold
1680-1760	print end of day stock
1770	next player
1780-1790	check for end of week
1800-1870	end of week
1880-1930	change M(J) to XS with decimal point

screen. After about 50 raindrops have fallen from the cloud, a tune is played.

There is a short subroutine to transfer M (J) to XS and put in a decimal point. E.G. If M (J) was 5000, then XS would be "50.00" after: GOSUB 1910.

This is done by:

POKE 1143 + RND(7)

If the variable W is 1 (heavy rain) then another raindrop is printed. The raindrops are then scrolled diagonally by:

EXEC 31000

Hints on conversion

It should be fairly easy to convert Fizzy Pop to other micros. The machine code is only for the graphics so is not really necessary. You can make up your own graphics routines. PRINT @ is the Dragon way of PRINTING at different places on the screen. PRINT @0,"" is the top left hand corner. PRINT @ 511,"" is the bottom right hand corner.

Look closely at your Amstrad

Brian Lewis shows you in detail how this keyboard organ program and ASCII generator works. Cross refer to your user manual

This program demonstrates many of the Amstrad's advanced features while giving a useful insight into the inner workings of ASCII code. It's a keyboard organ program and ASCII generator.

The program is split into two parts: lines 100 to 280 produce the first screen, and by pressing any key — excluding break — a musical note and the ASCII code associated with it are produced. When more than 50 notes are sounded, part two of the program (lines 290-530) plays all 50 notes consecutively with three voices.

Note: All variables have been printed in lower case. Both loops have been indented by four spaces. If more than one space is left, it is specified.

This has been done so that you can follow the program more easily and it is recommended that it is adopted as a standard on all Amstrad public domain programs.

Variables

t mid voice
s high voice (s=tx2)
u low voice (u=t/2)
a note array
b count variable 1-50
k\$ value of key pressed
k ASCII value of key pressed
x toggle between the two messages

How it works

• Cross-references are to Amstrad user manual

- 100 **Defint** ch 8, p 10: sets all variables to integer values to save memory. Try replacing Defint with Def real and run program by escaping out and print Fre(" ") to see memory saving
- 110 **Zone** ch 8, p 53; ch 3, p 6: changes print zone width, i.e. sets comma tab stops to column 0,10,20,30 etc when using zone 10
- 130 **Every** ch 8, p 17: timing command used for printing in window #2. Every 100 = 2 seconds. See also lines 500-530
- 140 **Mode** ch 8, p 28: mode 0 = 20 columns, mode 1 = 40

columns, mode 2 = 80 columns

160-170 **Window** ch 8, p 52: screen window command. Line 160 opens a window in screen centre and scrolls the ASCII code independently of rest of screen. Line 170 opens a window at bottom right of screen only and displays, in this example, lines 500-530

• Amendment to book, ch 8, p 52: example should include #1, 10,30,7,18

180-200 **Pen** ch 8, p 34: sets pen for window 1 to ink 1, pen for window 2 to ink 1. No ink command is issued so ink 1 is default colour yellow.

• Amendment to book ch 8, p 34: example should read Pen #1,2 not Pen 1,2

210-280 **While, Wend** ch 8, p 51: loop commands which terminate when a command is true, i.e. b X50

• Amendment to book appendix III, page 1: ASCII characters should read DEC 1 = CTRL(A), DEC 2 = CTRL(B)

290 return to mode 1, 40 column screen

300-340 two windows are used again but with different

colours. In this mode there is a choice of four out of a possible 27. Try listing in #1 or #2, i.e. type LIST #1 to see what happens after escaping out of program. Window #1 is ink 3, window #2 is ink 2 so defaulting to red and light blue

360 ensures that keyboard buffer is flushed during execution of program

350-390 plays all 50 notes consecutively with the lower and higher overtones purposely out of synchronization, to give a feeling of life and movement. Try putting voices back into synchronization for comparison or use envelopes for more sophisticated sounds. Ch 6, p 8

400 prints ASCII code for all three voices

410-430 **Sound:** defaults to value 4 if not specified. Max number is 7 if no envelope is used. Compare lines 410 to 420,430

440-460 plays the notes and then starts again with screen 1

500-530 prints these messages alternatively in the #2 window

```

Keeping track of time

Do you need to know what date falls on which day? This program from R. W. Hatfield will help

If you have problems with dates, and we're talking about the calendar not the dried fruit, then this perpetual calendar program will be of invaluable help.

The screen displays the complete calendar for the year and month selected, and use of left and right cursor keys causes the following or preceding month to be scrolled on to the screen.

Conversion should be straightforward as no user-

How it works
100-200 instructions and title
210-420 initialisation
430-480 accepts input for year and month and converts month to numeric value
490-860 main loop as follows
520-580 evaluates instructions from keyboard
620-630 makes adjustments for ordinary and centennial leap years
670-760 calculates which day the month begins
810-910 provides screen display and calls for next instruction

defined graphics are involved.

Output to screen is entirely performed by display statements.

If you're the type of person that doesn't know whether it's Monday, Thursday or Christmas — this is the program for you.

Variables
Arrays: CALS, Month\$, Day\$
 hold data for screen display
Y input year
MDS input month
D month number
L leap year
T no. of complete years
S total of day advances for each year, leap year, and centennial leap year (every 400 years)
ML complete months
PL print list for dates
DS start point for day display

Death Star Interceptor CBM 64 £9.99

System 3

The packaging for this game describes it as 'graphically amazing; I would not say this but it is very good. You need a colour monitor to be able to appreciate, or even play it.

On the first screen you guide your ship up a runway and through a hole at the far end. External forces affect your movement.

In screen two the aliens swoop down firing missiles. In one corner is the earth, opposite this is the alien planet. When you shoot the master alien you are taken onto the planet surface.

Next you fly through a trench and shoot similar beings to the ones already encountered. The

graphics do not give much reality as they lack depth. On black and white monitors this is merely guess work as the colours are similar shades of grey.

Next you encounter walls which you must avoid crashing into, and you must shoot master aliens which, when exploded, fire at you.

Bugs were encountered from time to time which added a different, but not very original, dimension to it.

This game needs a joystick. **K.I.**

Spaceman Sid 32K Electron £7.95

English Software, Box 43, Manchester M60 3AD

This game is another version of the old favourite Moon Patrol. Every time such games hit the market they have a story line, this time it is a spaceman who has to guide his combat rover across the wastelands of the moon to recapture the dilithium crystal mines from the Martians.

As you continue with your mission you will be confronted by alien drones flying by at low level. To destroy them you need your front lasers. You need the back lasers to destroy the flying saucers.

You have to jump over ditches and sub-sector markings. There are five sub-sectors and when you have crossed all these you

enter a new one where all your concentration is required.

The graphics are good but the game lacks originality. A greater variety of aliens with their special features could have made this better than other versions. There are three levels of play. At each level it becomes more and more difficult to survive. This program comes with a lifetime replacement guarantee.

It's not a game to go over the top about, nevertheless an enjoyable one. **M.B.**

Braxx Bluff 48K Spectrum £6.95

Micromega, 230-236 Lavender Hill, London SW11 1LE

This is a mixture of inter-active story and arcade games. You are the pilot of a rescue vessel sent to the fast ailing crew of a previous mission. Your task has five phases: Lander, Walker, Land-Crawler, Sea-Crawler and return to Mother Ship.

A series of weird noises and unfamiliar screens shows Micromega's anti-copy loader working. It seems to take an age, but the graphics are superb when they arrive. The mother ship hovers over you. Define your keys/joystick, then listen to the music... it's really catchy! Dive down through the atmosphere of the planet, graphically stunning, but you'll be too intent on your instruments to see that much, which is sad because the 3D runway is quite something. Odd on you won't make it first time.

When you do, save your game to tape, it only takes a second, because as you start the walker phase you'll be attacked by a large and nasty creature! Get killed, and you're back to the beginning... unless you did save your game.

Graphics, sound and player facilities are all of extra quality here. It's really quite outstanding, with an intriguing plot. **D.M.**

instructions	80%

The galaxy — and beyond

Launch yourself into space
with these exciting games
which take you to the four
corners of the universe

Intravoid 48K Spectrum £4.95

Delta 4, The Shieling, New Rd, Swanmore, Hants SO3 2PE

The uninformative, 'roneoed' cassette insert heralds a poor, non-graphic adventure game, made using The Quill. An unimaginative, bland title screen, drawn using Melbourne Draw, leads to simple instructions in a redefinable character set.

You slowly work out the vocabulary that the program accepts — though there is no 'help' nor 'score'. You start in Zagro spaceport in search of The Crystal and can move to the Main City Complex, Landing Bay or Engineering Centre. On the journey you can 'Get food'; 'Get drink' and 'Pick up laser probe' as well as other items.

At one teleport unit you can

teleport to another place, while at another unit you cannot. Also, you can enter and move about in a Spacecruiser, but how do you get off? I couldn't, so I quit.

Next time round I went too near the Disintegrator — when the game ended I had scored zero.

There is sound and little use of colour, and a fair idea has not been developed enough to make it interesting or addictive. The one good idea is the use of enlarged computer style character set. **T.W.**

instructions	50%
playability	40%
graphics	N/A
value for money	30%

Dark Star 48K Spectrum £7.50

Design Design, 125 Smedley Rd, Manchester M8 7RS

Dark Star looked, at first glance, much like other arcade games, but later it became obvious that this was something special.

Spectacular graphics are becoming the norm with Spectrum games, and on Dark Star the effects are better than most. The object is to wipe out the enemy, but you do so with superb moving star effects, swiftly moving enemy craft, all while a realistic digital clock gently ticks away at the top of the screen. And you can check your position and status on the Tactical Sector Map.

The enemy are on several planets as well as in space, so you can attack enemy planets, land on them, and attempt to destroy enemy bases on land.

Lots of extras are included in a very professional program. User definable keys (plus joystick options), user selectable sound effects, and program options to give you a wide variety of games.

On the reverse side is another program called 'Spectacle! This is useable only with passwords, which will be announced sometime in the future. **D.N.**

SPECTRUM OWNERS

LET'S GET DOWN TO BUSINESS

OCP ANNOUNCE ALL PROGRAMS COMPLETELY REWRITTEN FOR ZX MICRODRIVE COMPATIBILITY & PLUS 80's FOR USE WITH 15 DIFFERENT CENTRONICS/RS232 INTERFACES INCLUDING ZX INTERFACE 1

★ FINANCE MANAGER ★

★ ADDRESS MANAGER ★

£8.95

(BOTH LESS £3 REBATE FOR EXISTING USERS ON RETURN OF OLD CASSETTE)

★ ★ 80 COLUMN - 'PLUS 80' VERSIONS ★ ★ £19.95

(LESS £5.00 REBATE FOR EXISTING USERS ON RETURN OF OLD CASSETTE)

Write to us for a quotation for the software, the interface and the latest high performance Japanese Dot Matrix Printer — you will find our prices very competitive.

Both programs are available in standard form which work only with ZX™ and Alphacom 32 column printers, and Plus 80 which work in conjunction with most Centronics/RS232 Interfaces and 80 column printers.

ADDRESS MANAGER and **FINANCE MANAGER** utilise the same "on the page" presentation and offer 48K Spectrum owners a 'professional standard' address filing, indexing retrieval, and financial analysis system. Below are examples of the screen presentations.

Both have been carefully constructed to provide the user with a tool that is extremely friendly and easy to use, the speed and presentation of these programs are second to none.

ADDRESS MANAGER features MULTIPLE INDEXING via our 3 way 3 character index, an ability to store over 400 full names and addresses or 1500 individual names/titles. USES include storing and updating names, addresses and phone numbers, printing out Xmas card lists, etc, mail order work, customer classification by type size (doctors have used this program to catalogue patients by treatment).

FINANCE MANAGER is a powerful, flexible and fast MENU DRIVEN general purpose program carefully designed to handle up to 255 separate accounts for domestic and business accounting applications. The magic of MACHINE CODE has enabled us to produce the very latest "on the page" presentation which lets you enter and edit data naturally, as if with a pencil and paper. That's not all, not by a long way. This program automatically raises a corresponding debit or credit for every entry, and will even open up a new account if an entry features an unrecorded account name.

Voted "The best value financial program available" by Sinclair user.

Accounts can be MERGED, DELETED, ANALYSED, MARKED as priority, RENAMED, EDITED and SCROLLED. Transactions can be RECONCILED, AMENDED, DELETED, PRINTED, DESCRIBED for analysis and RENAMED. Standing orders can be APPLIED, REMOVED, DESCRIBED, AMENDED, DELETED and even DUMMIED for planning purposes. Other features include DATE CHANGE, RUNNING TOTALS, 2 KEYBOARD MODES, PRINT PAGE/ LINE/BLOCK/FROM END/FROM START/FROM DATE etc., LIST BALANCES, FIELD ERASE/INSERT/DELETE, EXIT TO BASIC. You may not want all these features but they are there just in case.

★ ★ ★ ★ UTILITIES £9.95 ★ ★ ★ ★

- ★ MACHINE CODE TEST TOOL ★
- ★ EDITOR ASSEMBLER ★
- ★ MASTER TOOL KIT ★

Sinclair ZX MICRODRIVE COMPATIBLE

(Existing users wanting latest versions will receive a £3.00 rebate on return of old cassette)

From WHSMITH and other outlets or send cheque or telephone details to 0753 889055.

Replacement tapes only available from OCP direct.

OXFORD COMPUTER PUBLISHING LTD., 4 High Street Chalfont St. Peter, Bucks. SL9 9QB.

SOFTWARE ★ ★ ★ ★ SIMPLY THE BEST

Win four games for the BBC from Warlock Software

In this week's competition we're offering great games for your BBC from Warlock Software

Our competition this week gives 40 readers the chance to win a great prize — four games from Warlock Software.

The games are: Galactic Patrol, Tycoon, Devil's Causeway and Balloonacy and they're all for the BBC B.

Warlock Software was formed about six months ago and has already had one game for the BBC at the top of the charts, Spectipede. Now Warlock is releasing a batch of four games and these are the ones on offer this week.

Galactic Patrol was written by a Cambridge astrophysics graduate and contains over 100 pages of pure machine code. It is an arcade/adventure game and the graphics

are in 3D. There are five screens and five different skill levels.

You play a pilot in the Galactic Patrol and your mission is to protect earth colonists from attack by hostile aliens. At the beginning of the game you watch over them as they enter the transporter ship and continue your task as the ship makes its way through space. The ship has a protective shield but its strength varies depending on the skill of the pilot.

Other hazards include a failure aboard the transporter ship which makes it lose energy so that the colonists have to be evacuated and taken back to base. This necessitates flying through your own very efficient defences and you have to cope with your own force fields.

When you finally arrive back at your HQ, the passengers must

disembark to allow you to return for another batch of survivors. Every time you return the mission gets more difficult.

Devil's Causeway incorporates games within a game. The basic format is a maze but as you work your way through it, various subsidiary games are called up which you must complete to continue on your way.

Balloonacy places you in a balloon gliding through a dangerous sky. Time limits are the essence of this game. If you don't achieve your object within the time specified then a barrier closes and you're stuck.

Tycoon is different again. It's a property speculation game with first class graphics and sound.

This is definitely a competition well-worth entering since there's such a wealth of prizes. Study the two cartoons, read the advice we give you on this page and good luck!

How to enter

Study the two cartoons — there are a number of differences between them. Circle the differences on carton B and seal the cartoon and

coupon in an envelope. Write clearly the number of differences you found on the back of the envelope.

Post your entry to Warlock Competition, Home Computing Weekly, No. 1, Golden Square, London W1R 3AB. Entries close at first post on Friday November 16th, 1984.

You may enter as many times as you wish, but each entry must be on an official coupon — not a copy — and sealed in a separate envelope.

Important: please follow carefully the guidelines on entering — incomplete coupons and entries in envelopes with no numbers on the back cannot be considered. If you are a winner, the coupon will be used as a label to send your prize so clear writing is essential.

The rules

Entries will not be accepted from employees of Argus Specialist Publications, Warlock Software and Alabaster Passmore & Sons. This restriction also applies to employees' families and agents of the companies.

The How to Enter section forms part of the rules.

Warlock Competition

Entry Coupon

Name _____

Address _____

_____ post code _____

Number of differences found _____

Complete clearly and fully — if you are a prizewinner this will act as a label. Post to Warlock Competition, Home Computing Weekly, No. 1 Golden Square, London W1R 3AB. Closing date: first post, Friday November 16th, 1984. Follow carefully the advice in the How to Enter section including writing the number of differences on the back of your envelope.

Battle throughTime

In the year 2525 A.D., time travel is finally perfected. Scientists of the project send you into the time void equipped with an armed, all terrain vehicle. Your objective is to assist mankind in his various battles : from the prehistoric age to the aftermath of the final conflict. Only a successful mission can assure your return. Features include 'Hi-Score' table, two player option, two skill levels and continuous play facility.

uranium, avoiding various hazards.

ROBACTIVE — 100% extended basic.
Requires joystick. Only available by
mail order.

Send cheque/P.O. for £6.00
including p+p to:

ABSOLUTE, 8 Chapel Lane,
Houghton, Cambs, PE17 2AY

WD Software

QL Utilities (£10 on Microdrive)

This package offers single-key loading, running or deletion of files, multiple formatting of cartridges, and auto backup of files from one or more cartridges to another with optional over-writing of namesakes. In addition, a directory of 60+ files can be viewed without screen overflow. NB a VERIFY program is unnecessary — QDOS does this automatically. Now includes directory printed-out and "aprint" to print any or all files on a cartridge with optional dated titles. Owners of the earlier package can update by sending OUR cartridge and 25p.

Current Spectrum Software Tradewind (£5 Cassette)

Buy a ship, provisions and cargoes to trade between the harbours of the Coral Islands. Make a fortune if the weather and pirates let you live long enough to master seamanship and economics. A strategy/adventure game with graphics for 48K.

Jersey Quest (£5 Cassette)

Following an accident, you are stranded in the labyrinth of time and must find your own way back to the Present with the aid of persons and objects from Jersey folklore. Meet the Black Horse of St Ouen, the Dragon and Knight of La Hougue Bie, the Black Cat of Carrefour a Cendre, the Witches of Rocqueburg and many others. A text-only adventure for 48K in machine code (Quill).

Morse Tutor (£4 Cassette)

This one has it all! 4-19 words/minute, variable spacing, variable number of groups of random letters, numbers or mixed, random sentences, own message, single characters (including punctuation), variable pitch, FEEDBACK via screen, printer or SPEECH (phonetic alphabet via Currah u-Speech on 48K version only), and repeat facility. Takes you to and beyond RYA and Amateur Radio receiving standards. 16K and 48K versions on one cassette, 48K only on Microdrive cartridge.

Spectrum Programs on Microdrive

All the above are available on Microdrive cartridges at a price of £4.50 for one cartridge + the price of each program as shown above e.g. a cartridge with Tradewind and Morse Tutor would be £13.50. As a bonus, Gavin Monk's Indexed Loader is included free with each cartridge.

'Calling all whizz kids — my CLEVER CLOGS games are the ultimate challenge!'

These exciting games of skill and chance are the combined work of real life 'Clever Clogs' and their teachers to give you whizz kids the ultimate challenge in computer games that really make learning fun.

Exciting graphics, a wide choice of 'difficulty' levels, plus supplementary knowledge packs for several games in the range make Clever Clogs Britain's best buy in early learning software.

Starting with 'Party Time' for Age 3+, the Clever Clogs range brings a new approach to learning for whizz kids of all ages. And if you join the Clever Clogs Club you'll automatically be eligible for many money-saving special offers.

Selected titles available at W H Smith, Menzies and other leading retailers.

CLEVER CLOGS early learning games
