**IS THIS THE FASTEST PC EVER?**

New technology spawns the affordable, super-fast Archimedes

# APC CONTENTS

VOLUME 8 NUMBER 8 AUGUST 1987

## REGULARS

### 5 NEWSPRINT

An early look at Microsoft Excel for the IBM PC; multi-tasking for the Macintosh; PC-based neurocomputers; details of new versions of dBase; and more bugs in IBM's PS/2 DOS 3.3

### 137 LETTERS

Readers' chance to have their say

### 193 AFTER DARK

APC's re-named leisure column takes a trip to the Times in Tinseltown and then attends a murder party.

### 253 TJ'S WORKSHOP

More undocumented gems pepper this month's column as readers get behind APC's reintroduction of TJ's.

### 276 COMMUNICATIONS

Steve Withers surveys the latest modems and presents the latest on-line news.

### 279 ENDZONE

Important dates, user groups news, numerology and JJ Clessa's mind benders comprise APC's 'back bits'

### 282 ADVERTISERS' INDEX

## CONNECTIVITY

### 263 NEWS

The race is on to gain the advantage in LAN standards for PS/2 systems, and vendors move to facilitate PC-to-Mac links.

### 267 THE DOS-LAN JUNCTURE

Implementing multi-user applications within MS-DOS 3.1 or later is a challenge for programmers of LAN-portable software.

## FEATURES

### 111 CP/M MAKES PROGRESS

There's still lots of life left in CP/M computers, proves Mike James, as he takes a close look at CP/M Plus and makes it perform tricks that MS-DOS users would find difficult.

### 129 MANY HANDS MAKE LIGHT WORK

Already tired of waiting for OS/2? We decided that anything IBM can do, other manufacturers might conceivably be doing better. Peter Jackson went in search of the products currently available which can help you with multi-tasking.

### 152 PC SECURITY

You can lose a lot of sleep if you sit down and work out just how much easily-accessible information you have on your PC. APC decided to take a look at some of the products designed to exclude intruders. As you will read, some are patently ineffective while others could relieve your insomnia.

### 172 PATTERNING CD-ROM

The key to the widespread use of compact disk technology in the PC environment is a universal standard, which is now close to approval.

### 197 POPPING OUT YOUR POP-UPS

Jeff Prossie shows you how to sling TSRs in and out of memory.

### 223 A KIND OF MAGIC

Mike James presents a collection of algorithms that defy intuitive thinking but will, nevertheless, improve the performance of your programs.

## BENCHTESTS

### 36 ARCHIMEDES

Dick Proulx reviews the most exciting machine ever to come from Acorn — the Archimedes. Based on RISC technology, the Archimedes is probably the fastest machine APC has ever tested.

### 57 HP-28C CALCULATOR

For engineers, scientists and mathematicians, the programmable calculator puts a lot of PCs to shame. Nick Walker discovers the power behind Hewlett-Packard's new HP-28C.

### 67 INTEL INBOARD 386/AT

Can't wait for the price of 386 machines to drop? There's an alternative — plug an expansion card into your existing machine. Peter Jackson drives his PC/AT to new heights with Intel's own Inboard expansion card, and Orchid's Jet 386 also getting a quick spin.

### 79 WORDSTAR 4

Owen Linderholm reviews the latest version of that legendary word processor, WordStar. He finds it a desirable upgrade but doubts its ability to attract new users.

### 87 GRAPHIC WORKS

Computer artist Ian McInnell uses a Macintosh every day for his work. We gave him the new improved Graphic-works from Mindscape and it soon became a part of his palette of Mac art applications.

### 99 TURBO PROLOG TOOLBOX

Borland's Turbo Prolog gave PC-compatibles an AI programming language at a bargain price. Mike Luedert tests the official Borland toolkit for this package which was designed to remove the drudgery out of producing professional-looking applications.

### 118 ATARI PC

Atari's PC is a cheap IBM-compatible offering EGA (enhanced graphics) as standard. But the machine still has its problems, as Peter Jackson discovered.

### 232 A CRAY ON EVERY DESKTOP

The day of the desktop VAX has arrived. Nick Hampshire ponders the possibilities of very high-powered PCs and describes the obstacles to producing a desktop Cray.

### 244 MX-PASCAL

This Australian product should find a specific audience wanting cross-compilation capabilities. Ian Davies looks at the package and describes how cross-compilation works.
